## 1. Walking Canes

AMP-033062: Walking Cane/Walking Stick (Aluminium, Adjustable)

Adjustable in height by slipping spring locking pin. Fitted with PVC tip. Anodized bright polish finish, with wooden handle for better grip (also available in 'U' shape and 'L' shape handle).

AMP-033065 : Walking Cane / Walking Stick (Four legged).

Metallic stick with "U" shape hand grip. Broad base with specially angled legs, can be held close to user body for maximum support. Height is adjustable from 75 c.m. to 95 c.m.

AMP-033061 : Walking Cane / Walking Stick (Aluminium, Fixed)

Anodized aluminium bright polished fixed height cane. Fitted with L shape handle for better grip.

AMP-033070 : Tips for Walking Cane / Crutch (19 mm, 22 mm, 25 mm diameter)

Broad based non-slip moulded tip, reinforced with a steel insert that is moulded into the base. Suitable for cane and crutches. Available in 3 internal sizes of 19 mm, 22 mm & 25 mm.

## 2. Walkers / Rollators-

AMP-030220 : folding walker with foam grip Tubular steel frame mounted on 100 m.m. size ball bearing rubber castors. Height of under arm supports are adjustable from 105 c.m. to 135 c.m. Comes with detachable foam padded seat and rexine made back, for rest. Oven baked finish.

AMP-030119 : walker folding adjustable

AMP-030120 : walker folding adjustable with wheel

AMP-033023: WALKER, INFANT For age group 2 to 6 years. Tubular welded rectangular shaped ring fitted with adjustable saddle gear to hold the child in an upright position. Height of the ring is adjustable from 46 to 66cm. A handle at the front for the patient to hold. Overall width of the frame 50cm and length 53cm mounted on four 50mm size ball bearing rubber castors. Powder coated finish.

AMP-033026 : CRAWLER (Fixed Height) Aids elementary crawling when body support is required. Rexene made body hammock tilts forward or backward for correct positioning of the patient. Height is adjustable to accommodate children from 2 to 6 years of age. Powder coated frame beautifully finished.

AMP-033033 : WALKER ROLLATOR (Child, junior, adult) Light weight foldable walker, constructed of powder coated finished steel tubing with Two 10cm front wheels and Two safety PVC tips on rear legs. Each handle bar is individually adjustable for an exact fit. Patient pushes the handle bars to walk, front wheels eliminate side motion. Suitable for children Adjusts from 50cm to 65cm.

A M P - 0 3 3 0 3 0 : Walker Scissors Gait Preventive (Junior, tinytot) Tubular steel construction. Chrome plated balance ring and handle bars are adjustable in height. Entrances from rear through hinged balance rings, height of frame is 70 cm, height of balance ring adjustable from 80 cm to 100 cm or as desired. Fitted with a bent pipe below to separate legs for scissors gait. Mounted on four 75 mm size ball bearing rubber castors. Oven baked finish.

**AMP-033038 : Walker Paraplegia (Adult)**  
 Strong tubular construction. This walking aid provides complete balance support to a paraplegia patient and is fitted with shock absorbers. Comes with following replaceable and adjustable accessories to suit various patients.

- Pelvic harness with a belt and fastner to hold the patient firmly.
- Replaceable under arm crutches.
- Replaceable handle in front to hold with both hand.
- Replaceable can type handles.
- Replaceable forearm rest with hand grip.
- Replaceable seat for rest.

**AMP-033022 : Walker Invalid (Adult)**  
 Tubular steel frame mounted on 100 m.m. size ball bearing rubber castors. Height of under arm supports are adjustable from 105 c.m. to 135 c.m. Comes with detachable foam padded seat and rexine made back, for rest. Oven baked finish.

**AMP-033042 : Walking Aid (Aluminium, Fixed Frame & Height)**  
 Light weight anodized, polished aluminium tubular construction. The fixed frame walker is fitted with soft hand grips and mounted on P.V.C. broad based tips. Standard fixed height is 90 c.m.

**AMP-033043 : WALK AID FOLDING (adjustable)**  
 Light weight, aluminum tubular construction with powder coated finish. Single button release allows walker to be folded for storage on M.S.pipe hinge.

**TECHNICAL SPECIFICATIONS :**  
 Height. : Frame is adjustable from 81cm to 91cm by slipping spring locking pins in proper notch.  
 Inside Measurements. :  
 Width 45cm. X Depth 28cm.  
 Grips. : Fitted with soft PVC hand grips.  
 Shoes/Tips. : Four, broad based PVC shoes.  
 Approx. Measurements in folded position : 81cm x 50cm x 14cm. App. Weight: 2.5kg.

**AMP-033032 : ROLLATOR with Seat, Backrest: & Brakes**  
 Aluminum frame, Light weight foldable Rollator with padded seat, wire basket & detachable padded backrest tube. Each handle bar is individually adjustable for an exact fit. Patient pushes the handle bars to walk. Suitable for tall adults.

**SPECIFICATIONS :**  
 \*Frame: Sturdy 25mm diameter aluminum tube construction with powder coated finish.  
 \*Wheels: Four, 6" x 1" wheels.  
 \*Brake: Loop brake is ideal for slow down and permanent stop.

#### AMP-033037 : RECIPROCAL WALKING FRAME

Walker pivots on its two front legs, allowing it to be moved forward one side at a time, in step with the user. It also folds for easy transportation & storage.

##### SPECIFICATIONS:

- \*Frame. : Sturdy 25mm diameter anodized aluminum construction.
- \*Height. : Frame is adjustable from 76cm to 94cm by slipping spring locking pins in proper notch.
- \*Inside Measurements. : Width 50cm. X Depth 40cm.
- \*Grips. : Fitted with soft PVC hand grips.
- \*Shoes/Tips. : Four, broad based PVC shoes.
- \*Approx. Measurements in folded position: 78cm x 55cm x 13cm.
- App. Weight: 2.5kg.

#### AMP-033045 : WALKING FRAME

Walker fitted with two wheels of 5" diameter on front legs, allowing it to be moved forward with slight push. It also folds easily for transportation & storage.

##### SPECIFICATIONS:

- \*Frame. : Sturdy 25mm diameter anodized aluminum construction.
- \*Height. : Frame is adjustable from 78cm to 95cm by slipping spring locking pins in proper notch.
- \*Inside Measurements. : Width 44cm. X Depth 40cm.
- \*Grips. : Fitted with soft PVC hand grips.
- \*Shoes/Tips. : Four, broad based PVC shoes.
- \*Approx. Measurements in folded position: 78cm x 55cm x 13cm.
- App. Weight: 2.5kg.

### 3. Wheel Chairs

AMP-03710 : Steel Manual Wheel Chair (Economy Type)

AMP-03870 : Wheelchair, DLX, Folding + Recline Back

AMP-03750 : Steel Manual Wheel Chair (Heavy Duty Megweel)

AMP-03675 : Folding Steel Commode Stool with Backrest & Armrest Adjustable Height

AMP-03810 : Steel Manual Wheel Chair (Detachable armrest and footrest)

AMP-03720 : Steel Manual Wheel Chair (Meg Wheel)

AMP-03850 : Steel Manual Wheel Chair Heavy Duty

AMP-03790 : Steel Manual Wheel Chair (Commode)

AMP-03910 : Aluminum Alloy Manual Wheelchair (Complete Foldable)

AMP-03820 : Steel Manual Wheel Chair (Detachable armrest and footrest with leg rest)

AMP-03950 : Aluminum Wheelchair with Desk length armrest

AMP-03958 : C.P. WHEEL CHAIR (Pediatric)

AMP-031100 : Wheelchair, MOTORISED (Battery Operated)

AMP-033005 : Wheel Chair Folding (Adult, Painted)

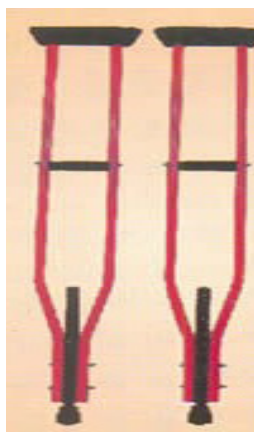

AMP-033011 : WALKER FOLDING ADJUSTABLE

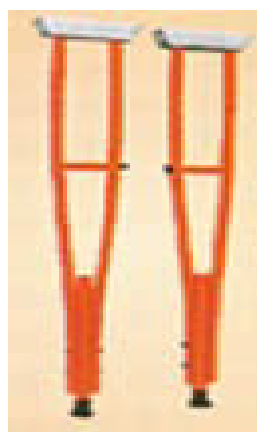

AMP-033014 : Wheel Chair Folding (With Commode)

#### 4. Crutches

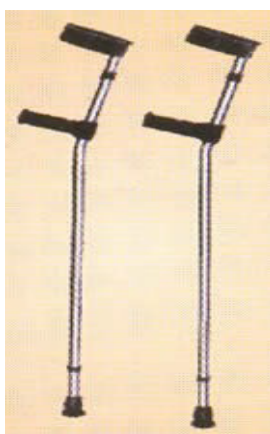

AMP-033052 : Crutches Underarm (Aluminium, Adjustable)  
Lightweight P.V.C. sheathed strong aluminium pipe crutches are fitted with high density rubber underarm support & hand grip. Height & handgrip adjustments are easily made with wing nuts in one inch increments. Fitted with rubber shoes. Available in 4 sizes 40", 44", 48", 52" height, with Six inch height adjustments, P.V.C. sheathing is available in Red, Blue, Yellow or Black colours.

AMP-033051 : Crutches Underarm (Wooden, Adjustable)  
Special light weight but strong wood construction. Adjustable in height in 2.5cm increment. Fitted with foam padded under arm piece and mounted on special broad based non-slip tips. Available in three sizes, youth, adult and tall adult.

#### AMP-033055 : Crutches Elbow / Forearm

Telescopic, light weight aluminium tube constructed unibody crutch has arm length & hand to ground distance adjustable with spring locking pins in proper notch. Forearm cuff and hand grip is of moulded plastic. Fitted with metal reinforcement PVC tip & finished in Anodized aluminum.

### 5. Belts and Braces

#### AMP:03BB01 :T.T ABDOMINAL BELT

A three bands of high quality elastic offers good compression support. For postoperative care ,post delivery care & ventral hernias

#### AMP-03BB02 :LUMBO SACRAL BELT

High quality 6" breathable elastic with double pull elastic straps to ensure proper compression and perfect fit, Additional elastic straps on either side of panel, Recommend for relief in cases of sprains and strains and strains moderate disc condition. Muscle spasms, Arthritic condition. Sciatica chronic unstable lumber spine and strains of the sacroiliac area, Provides support to the lower back

#### AMP-03BB03 :RIB BELT

A basic one piece wrap around support, All elastic with Velcro closure enables fully adjustable compression, Help restart motion while allowing chest expansion, Provides compression to the thoracic area following, surgery or rib fractures. Can be comfortably used under clothes.

#### AMP-03BB04 :HERNIA BELT

Recommended for use in reducible inguinal hernia Condition

#### AMP-03SL05 :CONTOURED L.S SUPPORT

Anatomically contoured malleable splints for correct posture, Additional strap closure system allows extra compression for the abdomen. Neoprene back panel ensure ultimate cushioning, aesthetics & life Of the belt

**AMP-03BB06 : ABDOMINAL SUPPORT**

A Velcro closure system enables adjustable compression and perfect fit, Sculptures body shape, Recommended in cases of abdominal post surgery non operable stomach injuries and pendulous abdomen, Recommended for use after pregnancy, Excellent tummy trimmer for ladies.

**AMP-03BB08 : FRAME BACK SUPPORT**

Moldable frame helps in exact fitting and Immobilization to lumbar, sacral and pelvic region. Splint frame allows perfect customization for improved comfort and immobilization. Recommended for use by workers also, Carrying heavy weights for support and prevention of back injuries.

**AMP-03BB07 : TAYLOR BRACE**

Made of ventilated and comfortable materials. Moldable frame helps in exact fitting, Flexible stays provide perfect support to the back and  
Waist, Shoulder straps help in secure fitting & better immobilization, the suspender covers the entire back and waist keeping the back in straight position, Recommended for posture correction and prevention of waist pain or injury

**AMP-03BB09 : MATERNITY BELT**

Provides gentle and firm support for alleviation of lumbar pain during pregnancy, Lifting and support can be controlled independently, Recommended for use from 20 weeks of pregnancy on ward

## 6. Fracture Aids

**AMP:03FA01 : CLAVICLE BRACE WITH VELCRO**

Inter – Scapulae pad made of high quality material, four way strap closure is done in the back by a hook & loop velcro system, Recommended for postural disturbance

**AMP-03FA04 : UNIVERSAL SHOULDER**

Conventional two piece design with high  
**IMMOBILIZER**  
immobilization, Made out of durable 3 layered bonded fabric, Plush looks, non tear able and wrinkle free

**AMP-03FA03 :CAST SHOE**  
Top made of laminated foam with cotton, polyamide and velcro closures for perfect fit, Ripple sole to avoid slipping, Shoe allows normal walking motion and balance, Recommended in post surgery and as bandaging shoe

**AMP-03FA02 : POUCH ARMSLING**  
A high quality foam fused fabric envelope for the arm provides good comfortable support and improves patient compliance, Shoulder Pad included, Arm is held very comfortably since its weight is transferred to the opposite shoulder and good support to arm or shoulder in Case of closed or surgical management of strain sprain and fractures.

**AMP-03FA05 :ELASTIC SHOULDER IMMOBILIZER**  
Smart sleek well ventilated & comfortable. Provides four way immobilization elastic belt and buckled grips immobilize the injured arm

**AMP-03FA06 :ADJUSTABLE SHOULDER**  
Provides therapeutic warmth, compression and support to the Shoulder, aiding in the healing process of shoulder injuries.

## 7. Knee and Ankle Support

**AMP:03KA01 :ANKLE BINDER**  
The ankle support provides both ankle and arch support, Relieve pain while facilitating healing and keeping the ankle flexible

**AMP-03KA02 :ANKLE BRACE**  
Open Velcro closure help in controlled compression & easy application, Recommended for support of weak ankles or minor sprains

**AMP-03KA03 :ANKLET**  
Seamless tubular cloth woven from high quality cotton, Nylon & Rubber yarn one piece design to provide optimal pressure. It contours the ankle gently and comfortably. Recommended for mild ankle sprains and moderate support.

**AMP-03KA05 :KNEE CAP WITH OPEN PATELLA**  
Provides mild compression, warmth & support to the knee. Seamless tubular cloth woven from high quality cotton, Nylon & rubber yarn.

**AMP-03KA04 : KNEE CAP WITH HINGE**

Completely adjustable straps provide comfort and compression Control. While keep the flexion movement of the knee intact. Recommended for swelling and relief of pain in pain arthroscopic surgery

**AMP-03KA06 : ELASTIC KNEE SUPPORT**

250mm wide elastic body & Velcro closures provide controlled compression Nylon hinges provide side splinting but free flexion movement. With patellar opening

**AMP-03BB07 : KNEE BRACE LONG**

One piece made from PUF fused fabric for comfort, Velcro closure with removable slaps, Anatomically contoured back splints & spring steel splints on the sides ensure rigid immobilization. Recommended for complete immobilization of the knee joint

**AMP-03KA08 : KNEE BRACE SHORT**

Covers with knee, foam fused fabric to provide excellent comfort. Anatomically contoured splints & spring steel splints on the side ensure rigid immobilization

## 8. Cervical Aids

**AMP:03CA01 : CERVICAL COLLAR SOFT WITH SUPPORT**

Conventional collar with PE reinforcement made out of high density P.U foam covered with soft, hypoallergenic cotton stockinet. Recommended for use by workers also, carrying heavy weights for support and prevention of back injuries.

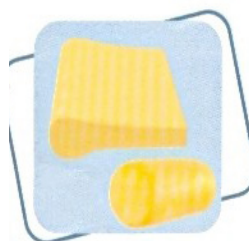

**AMP-03CA02 : CERVICAL COLLAR HARD**

Product is made of polyethylene sheet edged ADJUSTABLE with round foam and covered by leather straps, A Two Piece structure for perfect fit ant easy Adjustment, Air holes for ventilation and hook & loop closure to provide easy application and adjustment, Recommended for maintaining the cervical spine in Slight hypertension

**AMP-03CA03 : FOAM CERVICAL COLLAR SOFT**

Made of P.U foam covered with soft cotton stockinette and adjustable hook & loop closure. This compact and light collar offers full support while restricting cervical movement

#### AMP-03CA04 :CERVICAL PILLOW REGULAR & ROUND

It is made out of high P.U. foam of an optimum density to provide a firm but comfortable and soft support cures cervical spondylitis, snoring, neck & backaches

Indicated for: Used for Patients suffering from cervical spondylitis back Pain and cardiac stress, To correct snoring induced apnea, Can also be used on surgical tables recovery rooms and treatments tables, As a general Pillow for daily use.

## 8. Wrist and Forearm

#### AMP:03WF01 :ELASTIC WRIST SPLINT

Fits both hands by simply changing the location of the splint it can equally fit the right or left hand, Pre- shaped aluminum splint holds the wrist in an appropriate angle, Supplied with adjustable Velcro closures for the most comfortable fit, Provides additional support for weak or stiff wrists.

#### AMP-03WF02 :WRIST BRACE WITH THUMB

The product has been designed to provide full protection and Support to the wrist while hand remains free, Made from strong porous & high quality elastic & Velcro, Recommended for the preventions of carpal tunnel syndrome, Wrist strains arthritic conditions and in chronic case of weak wrists, Its wrap- around design allows full mobility of the fingers. Equally fits right and left hand

#### AMP-03WF03 :WRIST BRACE WITH DOUBLE LOCK

Made of strong porous & high quality elastic to allow breathing of the skin. Hook & loop closure for pressure adjustment. Recommended for post – traumatic pain & sprains.

#### AMP-03WF04 :WRIST SPLINT

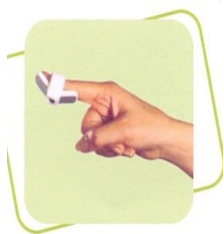

Pre-shaped malleable splint holds the wrist in an appropriate angle. Supplied with adjustable Velcro closures for the most comfortable fit,

### AMP-03WF05 :TENNIS ELBOW SUPPORT

Made from PUF lined & PE sheet reinforced fabric. Easy and adjustable loop & hook closure. Dumbbell shaped pad provides good compression & grip Especially recommended for gardening golf, tennis and any activity strain of the forearm muscles.

## 9. Finger Splint

### AMP:03FS01 :MALLET FINGER SPLINT

Padded with 'Ethafoam' Works on 3- point pressure principle to maintain the distal inter-phalangeal joint in hyper-extension to correct mallet finger deformity.

### AMP-03FS02 :FROG SPLINT

Unique four leg construction allows self closing, Maintains both inter-phalangeal joints in functional position, Lined with Ethafoam for enhanced comfort.

### AMP-03FS03 :THUMB SPICA SPLINT

Flexible fabric laminated foam contoured to fit over the thumb. Removable malleable splint supports the thumb in abduction & immobilize the CMC & MCP joints of the thumb.

### AMP-03FS04 :FINGER COT

U' Shaped clip style design for easy application, Design allows further taping (may be surgical tape) If required Keeps the finger immobilize in straight position

## 10. Traction Kits

### AMP:03TK01 :SKIN TRACTION SET (PUFF-LINER)

Available as self- adhering or PUF liner models. Consists of foam liner or an adhesive liner, Spreader block, Crepe bandage and Traction cord.

### AMP:03TK02 :LEG TRACTION BRACE

Offers easy, convenient and non invasive solution for leg traction, Velcro closure help in controlled compression and quick application

AMP:03TK03  
:PELVICTRACTION KIT  
Complete equipment to provide uniform and controlled traction to lumbo-sacral and lower thoracic regions, Consists of PT belt, Spreader bar, Traction pulley and Traction cord.

AMP-03TK04 :  
CERVICAL  
TRACTION KIT (SITTING)  
Complete equipment for cervical traction in sitting or sleeping postures. Contains traction pulley, Spreader bar, Head halter and Traction cord

## 11. Mobility Trainers

AMP-033207 : UN-WEIGH MOBILITY TRAINER (with Treadmill)  
The IMI Un-weighing Trainer enables partial weight - bearing therapy to be conducted with the assurance of patient Comfort and Safety, and with convenient access to the patient for manual observation and assistance. The electrical un-weighing trainer is designed to apply vertical support to remove the stress of bearing body weight, unit digitally controls weight bearing, and promotes proper posture and balance over a treadmill or the ground. The system allows patient to stand upright and use both arms freely. Harnesses give security to patients with limited trunk strength. The adjustable suspension bar adjusts to accommodate tall Children & Adults.

### SPECIFICATIONS:

- \* Un-weighing: Can be set 0% to 100% of the body weight, digitally.
- \* Un-weighing System: Up to 24", ideal for sit to stand exercises also.
- \* Vertical Oscillation: Foam padded, with adjustable Back-rest, Size 120cm x 210cm.
- \* Control Panel: Digitally display
- \* Patient weight, \* Percentage of Un-weighing, \* Mode, & \* Treatment Time.
- \* Capacity: 0-120 kg un-weighing range.
- \* Un-Weighing Harness: Two, Small and Standard size.
- \* Handrails: For patient's support, Adjustable & Removable.
- \* Frame measures: 42"L x 33" wide inside & fitted with Four, 6" lockable wheels.
- \* Power Supply : Unit Operates on 220V AC, with battery back-up system.
- \* Treadmill, Professional Walking Treadmill, with following specification:
  - Motor : Industrial grade, 2HP, AC motor with continuous duty.
  - Speed : 1 - 12kph. - Readout : Time, Speed, Distance, Incline, Heart Rate, & Program.
  - Belt : 18" x 52" running surface with heavy duty running belt.
  - Maintenance. : Lubricated bed/belt combination. - Power Supply : 220V. AC.

#### AMP-033204 : UN-WEIGH MOBILITY TRAINER (without Treadmill)

The IMI Un-weighing Trainer enables partial weight - bearing therapy to be conducted with the assurance of patient Comfort and Safety, and with convenient access to the patient for manual observation and assistance. The electrical un-weighing trainer is designed to apply vertical support to remove the stress of bearing body weight, unit digitally controls weight bearing, and promotes proper posture and balance over a treadmill or the ground. The system allows patient to stand upright and use both arms freely. Harnesses give security to patients with limited trunk strength. The adjustable suspension bar adjusts to accommodate tall Children & Adults.

#### SPECIFICATIONS:

- \* Un-weighing: Can be set 0% to 100% of the body weight, digitally.
- \* Un-weighing System: Up to 24", ideal for sit to stand exercises also.
- \* Vertical Oscillation: Foam padded, with adjustable Back-rest, Size 120cm x 210cm.
- \* Control Panel: Digitally display
- \* Patient weight, \* Percentage of Un-weighing, \* Mode, & \* Treatment Time.
- \* Capacity: 0-120 kg un-weighing range.
- \* Un-Weighing Harness: Two, Small and Standard size.
- \* Handrails: For patient's support, Adjustable & Removable.
- \* Frame measures: 42" L x 33" wide inside & fitted with Four, 6" lockable wheels.
- \* Power Supply : Unit Operates on 220V AC, with battery back-up system.

### Ankle Support

Our product range includes ankle support socks which are woven from high quality cotton, nylon & rubber yarn. The socks have Velcro enclosure that is applied as ankle shaped bandage around the ankle. These socks provide support, compression and immobilization to the ankles and are available in all sizes.

#### Features:

- Made of strong elastic webbing & Velcro
- Will not loosen after prolonged use
- Speed up the healing process by increasing the blood flow to damaged tissue
- Provide light compression to counteract tissue swelling
- Remain well oxygenated and therefore comfortable
- Reduce stiffness

### Knee Support

We manufacture best quality knee support socks that are made from sturdy, tapered, seam less elasticized fabric. The socks provide warmth & mild compression and thus, are ideally associated with old age, arthritis, sports injury etc. These socks are also used for improving swollen and painful knee caused by weakness or strain.

#### Features:

- Made from soft yarns for comfort and prolonged use
- Imported heat resistant rubber
- Two way expandable tubular type elastic provides mild support to the knee and increases blood circulation
- Surgical elastic retains body heat and keeps knee-joint warm.

### Varicose Vein Supports

We also offer a wide range of precision varicose vein support that is made to give relief to tired, aching and swollen legs. It provides controlled compression to the legs to squeeze away abnormal back flow of blood into the superficial veins.

#### Features:

Knitted from soft 100% cotton yarn

Heat resistant Malaysian rubber thread for optimal compression

Provides therapeutic support, warmth and uniform

compression from thigh to ankle

Being two way stretchable, soft and seamless with open toe and heel, it feels comfortable throughout the day.

### Walking Stick

.We are the manufacturers of Walking Stick that are molded into different forms and shapes. The alluring sticks have clocks on the top which acts as an additional attractive feature. Fabricated using quality grade Brass, aluminum, wood these are acknowledged for their lengths as it is suitable for people of different heights. Further, these can be customized as per the client's specification

### Cervical Collar

Our array of cervical collar ensures perfect fitting & good immobilization. These are conventional collar with PE reinforcement and are well ventilated for better relief to the end users. The collar's edges are also padded with molded 'ethafoam' with high cushioning coefficient and their height can be adjusted as per requirement of the clients.

### Abdominal Support

We are the manufacturers of Abdominal supports Which are specifically designed and made from durable cotton fabric with sturdy elastic for contour and anterior compression over abdomen.

### Back Support Strap

An unique light weight back support. Fabric with ventilation holes. Double side straps for desired compression. 25 point silicon triangular pad to be won on any cotton under cloth. Hand wash in cold water with mild detergent. Line dry. No Ironing. Available in small, medium, large, X-large, XX-large sizes.

**Neoprene Knee Support**  
Knee Support Hinged (Neoprene)  
Knee support Hinged (Neoprene) is a versatile knee support which offers the advantage of controlled compression around the knee and the rigid side support of a splint. It allows normal flexion and free movement of the knee joint.

**Abdominal Belt**  
Abdominal belt supports and compresses the abdominal muscles for waist line reduction and is used as a post operative or post delivery aid. Perfect elasticity. Breathable materials. No rolling over, no buckling. Salient feature Broad hook and loop tape panel offers better holding and size adjustability.

**Pouch Arm Sling**  
Pouch Arm Sling holds supports and immobilizes the sprained, broken or surgically operated arm in the flexion position while it recuperates. A comfortable design ideally suitable for supporting the arm with a cast. Adjustable Smart & sleek Convenient application.

**Silicon Heel Cushion**  
Designed to provide soft cushioning to the foot heel. Gel spot at the site of base of calcaneus distributes pressure and relieves pain.

**Contact Wrist Brace**  
Wrist brace with double lock is designed to support, protect and partially immobilize the wrist. It compresses the area and retain the body heat to allay local pain and inflammation. Extra grip. Extra porous Controlled compression. Easy application.

**Catalog Rib Belt**  
Rib belt is applied to the thoracic and upper abdominal region to compress and bind the rib cage during rib fractures and postoperative care, while allowing sufficient flexibility for comfortable breathing.

**Knee Cap**  
Knee Caps are tubular supports widely used in orthopedic practice to provide mild compression warmth & support to the limbs and joints, to allay pain and inflammation, generally associated with old age, arthritis, sports injury etc.

**Ankle Binder**  
Ankle Binder is an effective device to support, compress and partially immobilize the ankle following ankle sprain to control pain, oedema or inflammation. Composed of two components, elasticized wrap. and compression sleeve, which is knitted on a 3 dimensional computer controlled circular looms.

**Lumbo Sacral Belt**

#### HALLUX VALGUS SPLINT

Keeps the foot in the correct position during the night. Relieves pains and pressures. Prevents further development. Gradual correction of the toes. Recommend for use after a bunion operation.

#### PROTECTIVE GEL BUNION SHIELD

Reduces pain in the bony protuberance. Absorbs pressures. Avoids frictions in the Hallux Valgus. Adaptable to the anatomy of any foot.

#### ELASTIC BUNION PROTECTOR WITH GEL

Reduces the pain in the bony protuberance. Absorbs pressures. Avoids frictions in the Hallux Valgus. Adaptable to the anatomy of any foot.

#### SILICONE HALF MOON TOE SEPARATOR

Protects against corns and interdigit friction. Reduces pain. Helps in terms of toe alignment, ingrown toe nails and in post operative problems.

#### COMPLETE GEL FOOT PINKY PROTECTOR

Ideal for tired and diabetic feet. Absorbs pressure. Prevents calluses and hardness. Reduces pain. Helps in terms of toe alignment, ingrown toe nails and in post operative problems.

#### SILICONE TOE GEL SEPARATOR

Helps toe alignment and helps in metatarsal joints caused by Hallux Valgus. Relieves friction and protects against interdigit corns.

**METATARSAL PINKY PROTECTOR**  
Protects the frontal and metatarsal regions of the foot. Prevents calluses and hardness. Protects hammer and claw toes. Relieves symptoms of arthritis.

**POLYMER GEL HEEL PROTECTOR**  
Prevents friction and pressure thus preventing blisters. It prevents friction caused by the side of the shoes and prevents any pain caused by footwear in the achilles heel area and also contains an adhesive support.

**TRANSPARENT HYDRO GEL AMPOULES DRESSING**  
Due to its special density and the mineral oils it contains, it softens and protects the skin. Reduces pain. Helps in terms of toe alignment, ingrown toe nails and in post operative problems.

**BOYNER CITY COMFORT INSOLE**  
City Comfort will ensure moderate reduction in the plantar cushion of the insole so that the pressure of the body can be equally distributed to the points of the foot. On the occasion of the launch of City Range, Ms. Ranjana Walia, Marketing Director, Boyner Clinic said "In India problems related to feet are common, but till now there were not many options available besides conventional medicines. City Range insoles will help the patients having Rheumatologic, arterial diabetic problems, elective mechanical metatarsalgia, calcaneo-valgus/varus, tibial venous pains, etc. These diseases make the feet more prone to allergies and related problems.

**DIAVITAL MEDICAL SPECIAL SOCK OR DIABETIC FEET**  
Special sock for sensitive, risk or diabetic feet. Inner gel sole in the diavital gel model. Made with comfortable material. Special model with extra padded sole. Special flexible design, not tight around the edges and with a special shape in the heel area. A variety of models and colours.

**FOOT SCANNERS**  
ACMI INTERNATIONAL, offers professional solutions for highly accurate dynamic pressure measurements in all kind of set ups. Our primary aim is to offer the customer an affordable pressure measurement system with the best specifications to obtain an accurate result, combined with the clearest and easiest user interface in hardware and software.

**ELASTIC GEL CUT OUT TUBE**  
Relieves pressures and frictions on the toes. Protects claw and hammer toes. Useful for keratotic injuries. Helps to reduce scar tissues

#### BOYNER SENSITIVE INSOLE

It will help the patients with diseases related to feet like Rheumatologic, arterial or diabetic feet which need maximum comfort and integral cushioning. It will also provide stabilization and secured support which will help the patient to walk comfortably. These insoles can be fitted into any type of city shoes (daily wear shoes - including open sandals) which give patients the freedom to wear regular shoes comfortably.

Sensitive City insoles will also help in re-cushioning of the metatarsal support. It will also provide stabilization and support to the foot.

#### BOYNER FINE CITY INSOLE

Fine City and City Comfort insoles will help the patients with diseases related to elective mechanical metatarsalgia, problems like Calcaneo-valgus/-varus, Supinating or pronating front foot (Supination is a triplanar motion involving the foot moving down and towards the center of the body and Pronation is triplanar motion of the subtalar joint involving the foot moving up and away from the center of the body), Tibial Venous Pains, Chronic instability of the ankles, Inner or outer gonalgia.

#### POSTURAL MEASUREMENT DEVICE

A good symmetrigraph posture grid is essential for performing thorough patient assessments and makes it possible for you to develop a comprehensive plan for treatment.

This Baseline Symmetrigraph Posture Grid is the ideal solution for documenting your patients' progress, creating case history that you will need for insurance claims, and communicating effectively with your patients and other medical professionals working on the case. The posture grid size is 25" x 48" and can be suspended from the ceiling or wall bracket. This set includes a plumb bob for measuring alignment as well as a suspension cord.

#### BOYNER FRAGILE FEET INSOLE

Fragile Feet and Sensitive City insoles will help the patients with diseases related to feet like Rheumatologic, arterial or diabetic feet which need maximum comfort and integral cushioning. It will also provide stabilization and secured support which will help the patient to walk comfortably. These insoles can be fitted into any type of city shoes (daily wear shoes - including open sandals) which give patients the freedom to wear regular shoes comfortably. Sensitive City insoles will also help in re-cushioning of the metatarsal support. It will also provide stabilization and support to the foot.

### Trimmer Based Digital Hearing Aids

#### Space

- 100% Digital
- Adaptive Feedback

#### Cancellation

- Speech Enhancement
- 12 Band Equalizer
- VC w/ Enhanced Taper

#### Control

- Hi-Fidelity Sound
- Multichannel processing
- Built in Equalizer
- Low Battery indicator
- Incorporates thin tube system.

### Erika (New)

- Surprising attractive features changing the way the patient will hear Real Dynamics.
- A 12 Band Digital Hearing Aid offering Hi Power solutions for Severe Hearing loss category.
- Available in BTE, ITC & CIC

### ALPS TURBO D (AGC, o)

- Turbo D is a low noise high performance hearing aid. The TURBO-D is a compact powerful hearing instrument which features two pre-set trimmer controls. Available in BTE/ITC/ITE packaging. The pre-set 'H' control for low frequency suppression and (AGC.o) control 'A'. These controls are trimmer operated. The normal application is for a patient with a conductive or sensorineural moderate to severe hearing loss. This light weight small size hearing aid is ideal for both Children & Adults.

### ALPS TURBO D BTE

- The TURBO is a compact behind-the-ear hearing instrument which features two pre-set trimmer controls. The pre-set 'H' control for low frequency suppression and Output control 'P'. These controls are technical operated. The normal application is for a patient with a conductive or sensorineural moderate to severe hearing loss. The forward facing microphone is situated above the output nozzle.

### ALPS BTE PP

- Push - pull amplifier
- P - control
- H - control
- Telecoil
- M.T.O. switch
- Direct audio - Input system

#### TURBO

- The TURBO is a compact behind-the-ear hearing instrument which features two pre-set trimmer controls.
- The pre-set 'H' control for low frequency suppression and Output control 'P'. These controls are technical operated.
- The normal application is for a patient with a conductive or sensorineural moderate to severe hearing loss.
- The forward facing microphone is situated above the output nozzle

#### ALPS High Gain N, H, HH

- Electret Microphone Forward Facing
- Separate Switch
- 3 Positions :  
O - Off  
T - Telephone  
M - On Mic
- Volume Control :  
Numbered 1-4 for ease of setting
- Available in 3 version :  
N, H & NH

## 1. Back Care

### BIKERS

Amron Biker's is useful for patients of initial/mild backache. The two wheelers drivers are at high risk of acquiring low backache & slip disc. This product uses the international technology which is used by dirt riders & professional biker's all across the globe to protect their low back from stress & injuries.

#### FEATURES

- Twin Spring Flex Splints
- Special Fused Composite Back
- Short Elastic : Snug Fit
- Semi Rigid Design

### L.S. BELT

#### Amron Lumbo

Sacral Belt is scientifically designed and ergonomically crafted to support and immobilize the lumbo sacral region.

#### FEATURES

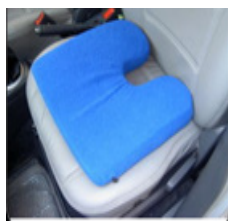

- Semi Rigid Design
- Malleable Aluminium Stays
- Extra Resilient Foam Padding
- Terrylined Inner Surface
- Multiple Eyelets for Aeration
- Velcro Closure for Proper Fitting

### BACKREST

Wrong sitting posture is one of the main causes of backache. AMRON Backrests are scientifically & ergonomically designed which are available in 4 different designs for different seats.

### COCCYX SEAT CUSHION

AMRON Coccyx seat cushion has been ergonomically designed to relieve the pressure on your coccyx region, and the wedge shape design holds the spinal posture correctly. The slight inclined design helps promote proper posture, increases blood circulation while sitting & driving. This cushion has a cut in the middle of it to prevent the tailbone from contacting the flat surface.

#### FEATURES

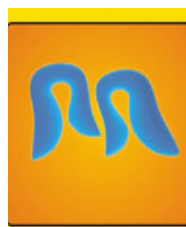

- Relieves pressure of the tail bone and bony prominence areas.
- Unique cut-out section, minimizes painful pressure to the coccyx region
- Gently angled to promote correct spinal alignment for better posture.
- Reduce tailbone pain during pregnancy.
- Made up of medical grade PU foam.
- Use it at home, in the office, or in the car.

## 2. Foot Care

### FULL LENGTH INSOLES RANGE

Amron has a widest range of full length silicone shoe inserts. True medical grade silicone is one of the most effective & appropriate material for foot care products because of its unique quality of everlasting resilience. AMRON full length silicone insoles range include 4 different variants prevent various foot problems.

### HEEL CUP RANGE

Amron has a widest range of heel cup range, specially designed to absorb shock & give right elevation to the heel and thus provide relief in shooting heel pain. It can be used in cases of Achilles Tendonitis, Plantar Fasciitis, Heel Spurs, and calluses on heels. AMRON heel cup range is available in 4 different designs.

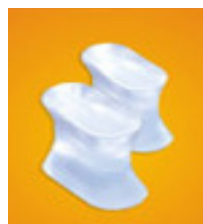

#### FRAGRANT FEET

Feet are generally covered by shoes & socks for whole day. This leads to sweating which later results in foot odor.

Foot odor is one of the common problems of the foot which generally does not get proper attention by the people. Amron Fragrant Feet is unique foot bed which can be inserted into a shoe. Amron Fragrant Feet helps to keep the feet fresh by absorbing foot odor.

#### FEATURES

- Fights Bacterial & Fungal Growth
- Active Charcoal Layer Absorbs Bad Odour
- Special Cotton Layer keeps feet dry
- Special Pin Holes for Aeration
- Natural Latex Provides Cushioning Effect
- Available In 3 Sizes S,M & L

#### TOE CARE RANGE AMRON

Toe Care Range is specially designed with different variants to prevent and correct various toe deformities.

### 3. Knee Care

#### KNEE CAP

- Made Up Of 4-way Stretchable Spandex
- Cotton Lining For Comfortable Long Use
- Anti Sliding Property With Reversible Patella
- Exerts Uniform Stability Over A Joint
- Super Absorbent Lining Provides Comfort & Durability
- Available In 5 Sizes I.e. S ,M ,L , XL & XXL

#### KNEE IMMOBILIZER

Knee is a complex & largest joint. Knee Surgery (Total Knee Replacement) & Knee injuries might require immobilizing the knee joint.

#### FEATURES

- Has special grade malleable aluminum stays
- Made up of soft breathable fabric
- Multiple Velcro for proper adjustment
- Available in 4 sizes i.e. S,M,L & XL
- Extra Elastic Band for additional support

## 4. Neck Care

### CERVICAL COLLAR

Cervical Collar is used for supporting the neck and protecting it against jerks impacts and vibrations, recommended where a partial or controlled immobilization or the cervical spine is required.

#### FEATURES

- It is made out of medium density soft polyurethane foam
- it is covered with soft breathable fabric.
- it has multiple eyelets to provide air circulation
- The velcro offers quick, easy application and removal
- Excellent Flexibility with optimal Support
- Ultimate Comfort

### CERVICAL PILLOW

Using conventional pillows is the root cause of Spondylosis, Neck pain & other neck related problems.

#### FEATURES

- Corrects the user's resting position so that his head & neck are at the optimal angles to the torso and the resting surface.
- Improves the blood circulation.
- Relieves cervical tension.
- Enhances relaxation by reducing pressure on the joints.
- Scientifically Designed
- PU Foam with Resilience
- Soft Breathable Fabric
- Excellent Flexibility
- Absorb Vibrations
- Ultimate Comfort
- Comfortable to sleep either on back or sideways
- Contoured Cervical Pillow

## 1. Cervical Collar

Cervical Collar (Hard) Code :  
RA3104

### Features

Made of high-density polythene sheet. Banian foam padding for comfort. Velcro closures to easy application removal and adjustment. Holes provide for air circulation.

Cervical Collar (Soft) With  
Eyelet

Item Code: RA3100

### Features:

Unique contour of soft foam accommodates the chin comfortably  
Double layered foam for warm comfort and snug fit around neck  
Splint inside the collar provides stiffness for better neck support  
Fine, knitted fabric cover absorbs sweat and is skin-friendly  
Eyelets provide ventilation  
Size: Small, Medium, Large

Cervical Immobiliser (Philadelphia  
Collar) Code : RA3108

### Features

Two piece, pre-moulded design for perfect and comfortable fit. Mandibular (front) and occipital (back) splints limits flexion and extension movements of cervical spine. Made of unique non-absorbent sturdy foam that is easy to clean and maintain. Frontal opening for tracheotomy. Ventilation holes add comfort for extended use.

Cervical Immobiliser (Sprain  
Collar) Code : RA3110

### Features

Single piece collar with pre-formed chin-up to control flexion. Sturdy non-absorbent foam construction. Large frontal opening allows tracheotomy. Ventilation holes keep patient neck cool and dry.

## 2. Braces

### Elastic Wrist Brace

Item Code: RA3500

#### Features

Simple to apply, easy to adjust.

Just touch to close.

Peel to open.

High durability elastic material.

Indicated for / Application

For strains and strains post fracture, bursitis microtrauma.

Tenosynovitis, arthritis and other conditions.

Protects both wrist and upper bone.

Size

One size fits all

### Taylor Dorso

Lumber Spinal Brace Deluxe

Item Code: RA3308

Elastic abdominal panels provide the required compression. Thoracic straps of 4" elastic provide comfortable fixation of the brace to the body. Two rigid upright para-spinal and lateral bars of lightweight are pre-contoured to keep spine in its natural position. Clavicle straps with cotton stockinet covered foam pads correct shoulder posture.

### Hyper Extension Brace (Ash Brace)

Code : RA3216

#### Features

Designed to act as three-point principle by exerting pressure against sternum and pubis on anterior aspects and the Lumber region on the Posterior Aspect. This fixes the Lumber vertebral column in a hyperlordtic position. Can be fitted to any patient due to the sliding arrangements.

### 3. Cock- Up- Splint

Elastic Cock- Up- Splint (Small Type) Code : RA3502  
Pre-shaped mouldable palmer splint allows immobilization in dorsiflexion and flexible dorsal splint limits extension. Constructed of high quality coated-fabric with foam pad and sweat absorbing lining for comfort. Three sets of buckle and velcro straps allow easy application and provide complete immobilization to the wrist. Thumb flap with velcro closure keeps the thumb in slight abduction. Designed separately for right and left arms.

Elastic Cock- Up- Splint (Long Type) Code : RA3504  
Pre-shaped mouldable palmer splint allows immobilization in dorsiflexion and flexible dorsal splint limits extension. Constructed of high quality coated-fabric with foam pad and sweat absorbing lining for comfort. Three sets of buckle and velcro straps allow easy application and provide complete immobilization to the wrist. Thumb flap with velcro closure keeps the thumb in slight abduction. Designed separately for right and left arms.

Cock-Up-Splint : RA3508  
Made of Aluminium sheet, lightweight and easy to apply.

Cock-Up-Splint (Aluminium) Code : RA3506  
Plastic-coated malleable Aluminium helps to keep the wrist in extension. Foam padding for comfort. Velcro straps for easy removal and application.

Knuckle Binder Code : RA3528  
Concepts of circular stainless steel spring are applied to maintain constant pressure unlike rubber band. It is well padding, unbreakable, washable, reusable and economic.

Dynamic Radial Palsy Splint With Finger Thumb Attachment Item Code: RA3540  
Well padded, unbreakable, washable, reusable and economic. Finger-thumb attachments are optional. Adjustable wrist-tension by detaching one or two springs.

Dynamic Cock-Up Splint Code : RA3514  
Made of Aluminium sheet, light weight, easy to apply. It allows exercise against resistant to wrist, fingers and thumb. Can be applied over plaster cast too.

## 4. Walker

Walker Folding With Height Adjustment - Deluxe  
Item Code: RA3900  
Features  
Lightweight  
Made of aluminium  
Fully adjustable  
Foldable walkerette  
Size- Adult and child sizes.

Regular Walker Folding  
Lightweight Made of aluminium Fully Adjustable  
Foldable walkerette

## 5. Sticks and Crutches

Walking Sticks  
Lightweight sturdy aluminium construction, push button adjustment to fit any sizes.

Elbow Crutch  
Made of sturdy, plastic-coated, mild steel tube, lightweight. Telescopic height adjustment with press button arrangement. Padded forearm cuff for better stability for comfort. Suction rubber tip for better grip over the door.

Under Arm Crutches  
Made of lightweight, sturdy, plastic coated Aluminium tube. Foam padded axially for comfort. Easy adjustment in height. Suction rubber tip for better grip over the floor.

## 6. Wheel Chair

Wheel Chair Folding  
Robust Steel Framework Double X-Brace hinges assembly With Arm rest and Foot Rest 150mm solid front castor's Rear solid Rubber tyres Seat and Back of Tetron Fabric Hand Brakes A support Belt provided at Footrest level Measurement : 1045mm L x 680 mm W cx 910 mm H, seat size 425mm x 425mm x 425mm

Wheel Chair - Non Folding (Fixed seat)  
Features Robust Steel Framework Double X-Brace hinges assembly With Arm rest and Foot Rest 150mm solid front castor's Rear solid Rubber tyres Seat and Back of Tetron Fabric Hand Brakes A support Belt provided at Footrest level Measurement : 1045mm L x 680 mm W cx 910 mm H, seat size 425mm x 425mm x 425mm.

### Heel Cushion (Silicone)

The natural shock absorbers in the form of fat cells are given additional shock absorbing support with the use of heel cushion. It is comfortable to be used in shoes and can be permanently glued with adhesive to sleeper of chapples.

### C.T.E.V. Splint

Code : RA3814

C.T.E.V. splint.

The dynamisation is augmented by flexion-extension at the knee, while in use.

### Reclining Wheelchair

#### Features:

- Powder coating steel frame
- Reclining high back
- Detachable armrest
- Elevating footrest
- Solid castor and rear wheel

### Wheel Chair Folding

Item Code: nova-3006

These are provided with 18" Foam padded seat, Detachable Armrest, Front with 6" Solid Castors and Rear 26" Solid Wheels with brakes. The materials used for manufacturing these cases are Epoxy Powder Coated to enhance its durability.

### Sports Wheelchair

#### Features:

- Powder coated frame
- Fixed armrest and Footrest
- Seat width:35cm
- Capacity:100kgs
- N.W.T:18kg.

### Wheel Chair Folding with Commode

### Invalid Wheel Chair Non Folding Special

#### Features:

- Over-all size
- 41"L x 28"Wx33"H,
- 17" cushioned seat & back fixed
- Armrests front with 5" solid castors &
- Rear 26" solid wheels with brakes.

### Recycling Wheelchair

### Manual Wheelchair

#### Features:

- Folding
- Removable cushioned seat & adjustable cushioned back
- Removable armrest
- Adjustable leg rest with cushion pad support
- Adjustable foot rest
- Front with 150mm solid castors & rear 650mm solid wheels with breaks
- Pre-treated epoxy powder coate

### Electronic Wheelchair

#### Features:

- 38" L x 25"Wx32"H
- 15" Seat with fixed armrest
- front castors
- rear 24" solid wheels with brakes
- epoxy powder coated finish

## AFO And Thigh Shells

### AFO Padded

We are exporting AFO Padded. The use of quality raw material in the manufacturing of these splints provides both support and compression. We are in compliance with various industrial standards and offers features such as enhanced durability and high quality. We have stepped towards unlimited success and the credit goes to our entire team who has spent their time and efforts to make us stand in stiff market place.

### AFO Leaf Type

We are a Quality conscious company, introducing high quality products new to the Indian markets which are acclaimed for their high utility and extreme robustness. We have gained international acclaim due to our strict qualitative parameters in the manufacturing of these products. Leaf Type AFO is used in cases of weakness of dorsiflexion of the foot and peroneal palsy. It provides high level of wearer comfort due to anatomical shape at calf and leaf spring action type foot plate.

### Thigh Shell

in the preferred embodiment only one side has a pivot hinge, and inflatable pad means permits the device to be fitted to persons with legs of various size (thigh size). a thigh guard is pivotally connected to a knee (or shin) guard and the user's clothing is provided with an inside pocket to receive a plate on the thigh guard to hold the assembly in place on his leg.

**AFO Articulated**  
We are manufacturing AFO articulated. the use of quality raw material in the manufacturing of these splints provides both support and compression. we have due to our focus on quality of products, customization, process and service levels, our highly skilled service has been acclaimed for its minimal cost, as compared to competitive products that otherwise would have to be frequently replaced.

**Afo Fix**  
we are engaged in manufacturing a quality range of afos that are used when discomfort is caused due to twist or sprain or for fracture management. Owing to our client centric approach, we offer quality products at industry leading prices and ensure to deliver the ordered consignments within the stipulated time frame.

**AFO Otto Type**  
afo otto type are externally applied, and are intended to control position and motion of the ankle, compensate for weakness, or correct deformities. they control the ankle directly, and can be designed to control the knee joint indirectly as well. Ankle-foot orthoses (afos) are orthoses or braces, usually plastic, encompassing the ankle joint and all or part of the foot.

**AFO NHML Wall**  
AFOs are commonly used in the treatment of disorders that affect muscle function such as stroke, spinal cord injury, muscular dystrophy, cerebral palsy, polio, multiple sclerosis and peripheral neuropathy. AFOs can be used to provide support to weak or wasted limbs or to position a limb with tight, contracted muscles into a more normal position. We are manufacturing and exporting AFO NHML Wall.

**AFO Soft Inner Padding**  
This functionally efficient completely custom AFO offers split uprights, mechanical ankle axis, balanced footplate. Removable interface pads are designed to be washable and add needed comfort. We manufacture AFO Soft Molded Padding.

**CTEV Splints**  
We are supplying innovative splints which are simple and ready to fit, easy to use, effective and dynamic for infants having mild to moderate congenital talipes equinovarus and for those severe ctev deformities which are corrected by other methods like repeted plastering and surgery.

### Afo Ufo Design

we are supplying and exporting afo ufo design. They are used to immobilize the ankle and lower leg in the presence of arthritis or fracture, and to correct foot drop.

An afo may also be referred to as a foot-drop brace. leaf type afo is used in cases of weakness of dorsiflexion of the foot and peroneal palsy. it provides high level of wearer comfort due to anatomical shape at calf and leaf spring action type foot plate.

## Knee Joint and Bars

### Knee Joint Forged Type

The artificial knee joint for an artificial leg includes a pair of substantially parallel pivotal bars which are connected by pivoting joints to an upper part and a lower part of the knee joint, respectively. We are a Quality conscious company, introducing high quality products new to the Indian markets which are acclaimed for their high utility and extreme robustness. We have gained international acclaim due to our strict qualitative parameters in the manufacturing of these products.

### Knee Joint- Alimco Type

These Knee Joint is a Management of injured knee Post-surgical rehabilitative support to the healing knee Compression and support to prevent mild strain and sprain. They are manufactured precisely to the specifications forwarded to us by the clients. Manufactured in accordance with set industrial standards, these are known for their features such as superior strength, fine finish, durable performance.

## Foot And shoes

### Artificial Foot

The jaipur foot is so efficient that after this foot is fitted, a person can walk like a normal person without a stick or support, and even run, many of the patients can, after the fitments, go back to work in the field, factories, shops and offices. The jaipur foot has gained international acclaim and is one of the highest used prosthetics in the world. We have gained international acclaim due to our strict qualitative parameters in the manufacturing of these products.

### Pu Foot

We are manufacturing and exporting PU Foot. The PU foot that has been acknowledged by leading orthopedic experts as having greater flexibility, greater comfort and high durability. They are manufactured precisely to the specifications forwarded to us by the clients. Manufactured in accordance with set industrial standards, these are known for their features such as superior strength, fine finish, durable performance.

### Hitech BK Kit

### Imported Foot

## Leather Belt Suspensions

### Below Knee Belt

Leather belts we offer are available in different colors and sizes. It is made for regular usage and are sustainable. We have gained international acclaim due to our strict qualitative parameters in the manufacturing of these products. We have gained international acclaim and testimonials from our clientèle for the high quality that we deliver consistently. We are equipped with the state-of-the-art infrastructural facility which help us to meet the industry requirements.

### Knee Caps

These knee caps are manufactured by using high quality material and are available in various sizes and colors. We provide our knee caps to our clients at industry leading prices. Being a client centric organization, we are committed towards offering only quality range of products. Thus our entire range is manufactured in strict compliance with the latest technological advancements in the market.

### Velcro Straps

Owing to our client centric approach, we offer quality products at industry leading prices and ensure to deliver the ordered consignments within the stipulated time frame. All these factors helped us to capture both domestic and international markets and have enabled us to emerge as trustworthy partners amongst our clients. A Velcro Strap is much more versatile than using tape, rubber bands or even those hard plastic zip ties. A Velcro strap is softer, pliable and adjustable. They can also save you money since they are reusable. They are reusable due to their unique hook and fasten system.

### Above Knee Belt

We are supplying Above Knee Belt. Numerous rehabilitation use these products and these are available in a variety of choices in accordance with customers' specific requirements.

## Crutches & Mobility Aids

We are manufacturing aluminum crutches. Our crutches are specially designed with models to cover all height ranges and are available at very reasonable prices.

### Metal Crutches

We are supplying and exporting Metal Crutches. It provide the patient with extra stability to enable normal movement

### Wheel Chairs

We are offering a wide range of wheel chairs that are manufactured from quality materials. These chairs are known for their robust construction, durability and fine finishes.

### Tricycles

We manufacture deluxe model hand driven tricycle for facilitating easy movement of handicap people from one place to another. These tricycles are specially designed for easy maneuvering.

### Walkers

We offer Walkers which is fabricated using qualitative raw material like Steel Pipe, Aluminium and Metal Pipe. These walkers are specially designed for differently abled and aged people.

## Braces And Knee Supports

### PTB Brace

Our range is made at par with international quality standards using medical grade raw material. These braces are easy to wear and maintain.

### Knee Hyper Extension Brace

We are manufacturing and supplying knee hyper extension brace. This range has a varicose vein and is known for its durability, easy to wear and comfort fit. The raw material used in this range is sourced from reliable vendors across the globe.

### BK Brace

He knee brace has a flexion extension adjuster which can be fixed easily as per the recommendations of the doctor. The brace allows range of motion and fixed angle setting.

### Ankle Brace

The Ankle Brace is a patented ankle support that can be worn either preventively or during the treatment of an acute ankle sprain. The Ankle brace is made for either the left or right ankle.

### Taylor Brace

We are offering taylor brace back support with two rigid upright para-spinal and lateral bars of light-weight, which are pre-contoured to keep spine in it's natural position.

### Digital Hearing Aids

Digital hearing aids use precise mathematical calculations for the conversion of sound waves. These mathematical calculations, developed specifically by a computer, translate the sound signals to a corresponding digital code. This code is then changed and re-transmitted back by the mathematical calculations digital sound processing. Another feature of these hearing aids is their ability to duplicate the sound transmission that results in high efficiency of the device towards producing high quality sounds. Although the double transmission feature makes the digital hearing aids highly beneficial, the programmable analogue hearing aids enjoy the distinction of being better in terms of sound quality and functionality.

### Analogue Hearing Aids

These hearing aids function by converting the sound waves into electrical waves. Analogue hearing aids amplify all received sound signals without any discrimination. The variation in the audibility of the sounds can be rectified with the help of volume adjustment by the bearer. For the convenience of the consumer, the programmable analogue hearing aids have been devised, that are powered with different programs saved in them. The programs are designed to operate in a particular real-life environment and can be switched amongst them accordingly. Some programs are effective in high noise environments while some are suited for normal environments such as a conversation.

Our ISI marked hearing aid products include the following:

- Hearing Aids
- Hearing Aid Cords
- Silicon Ear Tips
- Audiometers
- Group Hearing Instruments
- Speech Trainers
- Ear Moulds
- Ear Plugs
- Sound Proofing

**Hearing Aids**  
Audéo S fuses the industry's brilliant, award-winning designs with a sophisticated technology. In other words, we've spiced up the Audéo portfolio. Adding Spice Technology means Audéo S products offer an unparalleled range of applications, in the same astonishingly small, elegant housings you already know and appreciate

**Phonex Una**  
Una is inspired by nature .Una offers you excellent sound quality at an affordable price and feels comfortable right from the start. With its reliable technology Una can improve your quality of life significantly. With Una quality sound becomes available for everyone. Una has a range of remote controls and FM options for you to choose from

**Hearing Aids**  
ReSound Ziga™ has one of the most impressive feature sets in the basic price segment. It gives clients who are looking for great value a unique listening experience which is usually only available in more expensive hearing instruments

**Audeo Smart III**  
Audéo SMART III proves that quality does not have to cost the world, with Standard CORE features such as SoundFlow Standard, WhistleBlock Technology and NoiseBlock Processing plus the freedom of full wireless connectivity. SoundRecover expands audibility for the full spectrum of sounds, and the Audéo SMART fitting range accommodates mild to severe hearing losses. If you value size/style with flexible control and look for proven performance and value, select Audéo SMART III

Year of estb.- 1967

**Behind-the-ear Canal Receiver Technology (CRT)**  
Ultra-small, lightweight, behind-the-ear (BTE) style that sits snugly behind the ear and connects to the ear with a nearly invisible thin tube  
Tiny speaker in the ear canal delivers quality sound  
Benefits include more natural sound and less occlusion (“blocked ear” feeling) than a traditional BTE

**Micro-completely-in-the-canal (micro CIC)**  
Smallest custom hearing aid available  
This tiny ultra comfortable in-th-ear solution fits deeply inside the ear canal making it hidden from sight.  
Since the microphone is at the opening of the ear canal, this style provides a more natural sound quality  
Suitable for mild to moderately severe hearing losses

**Open behind-the-ear (BTE)**  
Small BTE hearing aid attaches to a slim tube which directs sound into the ear  
“Open” type of fitting is very comfortable and discreet and has a more natural sound with less occlusion (“blocked ear” feeling)  
Suitable for mild to moderate high-frequency hearing losses

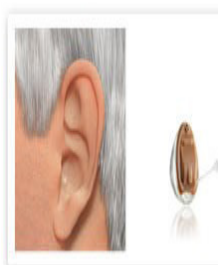

**Behind-the-ear (BTE)**  
Worn comfortably behind the ear while amplified sound travels down a tube to a customized earmold that fits securely into the ear  
Because they are larger, BTEs can accommodate bigger batteries for longer life and larger amplifiers for maximum amplification for people with a more severe hearing loss  
Most are compatible with assistive listening devices and are suitable for mild to profound hearing losses

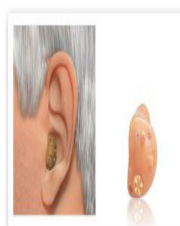

Ear Muff

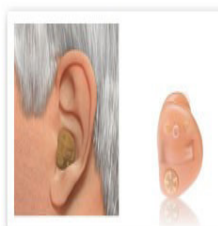

**Completely-in-the-canal (CIC)**  
Smallest custom hearing aid available, the CIC fits deeply inside the ear canal making it almost invisible and very discreet  
Since the microphone is at the opening of the ear canal, this style provides a more natural sound quality  
Suitable for mild to moderately severe hearing losses

**In-the-canal (ITC)**  
Custom-made to fit almost entirely inside the ear canal, making them difficult to notice  
Suitable for mild to moderately severe hearing losses

**Full shell (ITE)**  
Custom-made to fit securely and comfortably in the outer ear making it more suitable for people with dexterity challenges  
Larger in size than the half shell and are suitable for mild to severe hearing losses  
Accommodates larger batteries required for longer life

**Half shell (ITE)**  
Custom-made to fit securely in your outer ear, ensuring optimum performance and maximum comfort  
Suitable for mild to severe hearing losses

### Wheel Chair Parts

#### Wheelchair Tyres

The X-CORE 6 is a Wheelchair Tyre designed to replace existing tyre on wheelchairs. These six-spoked wheels are hollow, seamless, lost-core composite wheels with smooth sealed bearings. Plastic-coated or foam-coated handrims and Alshin polyurethane herringbone tread, rounded profile tires are available.

#### Dimensions:

The tyre are 20,24 x 1 inch  
The bearings are available in a choice of half-inch, 7/16-inch, or 12 millimeter

#### Aluminum Foot Rest

We offer comfortable foot rests, made up of quality Aluminium Foot Rest. Comfortable to use, these parts are fabricated using quality material procured from highly reputed vendors. We offer these chair parts at industry leading prices.

#### Wheelchair Tyres

We are engaged in manufacturing & exporting a broad range of wheelchair tyres. These products are specifically designed with all the manual and automatic in-build operation mechanisms

#### Foot Rest Plastic

Our range of footrest provides superior resistance to corrosive environment characteristic of sanitary sewers. In addition, the unique slip resistant design of footrest provides safety to the cleaning personnel and is available in five different sizes, shapes and bright colors.

#### Tyres

We offer to our clients more durable and innovative range of tyres. Our tyres have deeper treads for high mileage, broader lugs for cooler running.

### Castle Wheels

The front PU Caster Wheels are important because most of the bumps and vibrations you feel when riding in a wheelchair come from those wheels. Choosing the right wheels will give you a smoother ride. Most front caster wheelchair wheels are made from solid rubber, so the tires cannot go flat. This is very important for someone with an active, independent lifestyle.

### Rubber Castle Wheels

The front Caster Wheels are important because most of the bumps and vibrations you feel when riding in a wheelchair come from those wheels. Choosing the right wheels will give you a smoother ride. Most front caster wheelchair wheels are made from solid rubber, so the tires cannot go flat. This is very important for someone with an active, independent lifestyle.

## Lower Extremity Prosthesis

### 1. Knee

#### Smart IP

##### Features:

- Comfortable gait from very slow to very fast walking speeds
- Smoother speed progression because of enhanced program
- Weight activated stance control
- Stanceflex option improves comfort
- Battery life expectancy 9-12 months under normal usage
- 140° knee flexion

#### Orion

##### Features:

- Suitable for Level 3 activity
- Smart programming
- Microprocessor swing and stance control
- Immediate support on first step of stairs
- Supportive yield for sitting down
- Custom stability levels for individual requirements
- Variable cadence for a wide range of walking speeds

#### KX06

##### Features:

- Polycentric knee with hydraulic swing and stance or swing only
- 160° knee flexion
- Water resistant design
- Variable cadence
- Mode switch for cycling
- Multiple proximal adapter choices
- Distal pyramid

#### Endolite ESK

##### Features:

- Weight activated adjustable stance control
- Pneumatic swing phase
- Stanceflex
- 140° of knee flexion

#### E4BKD

##### Features:

Geometrically stable stance phase  
Pneumatic swing phase control  
125° knee flexion  
Linkage format provides good sitting cosmesis  
Proximal dome socket attachment  
35mm distal clamp

#### ESK+MKL

##### Features:

Weight activated stance control with lock option  
Pneumatic swing control  
Manual user operated lock  
115° knee flexion  
Universal thigh release lock operation  
Proximal full alignment

#### COMPACT SAKL

This compact, lightweight prosthetic knee is ideally suited to individuals with low activity level who need the security of a locked knee during walking.

##### Features:

Slim, low profile knee  
140° knee flexion  
Locks automatically on extension  
Thigh release

#### S500 Polycentric pneumatic knee joint

##### Features:

Max. load from 125kg to 136kg  
V2 pneumatic cylinder (Independent extension / flexion control adjustment)  
Interchangeable upper adaptor for AK or KD amputation  
Hydraulic-like smooth swing design for better walking pace  
New feature: The knee can be locked for training purpose or for elderly people

#### 4S3S/4S3T 4 Bar Mechanical Knee Joint

##### Features:

Polycentric knee joint makes it geometrically stable  
Viscous-elastic swing  
Max.load: 100 kg  
The extension stop allows adjustment of the instantaneous center of rotation  
For low walking demands and high safety needs.

#### 4S1S/4S1T Single Axis Knee Joint with Satnce Control and Constant Friction

##### Features:

Monocentric Safety Knee joint with extension assist is recommended for patients requiring stability but are able to walk without locked knee joint. The weight activated locking mechanism provides stability in the stance phase and a spring unit assists in extension. It is very light weight, thus easy to handle by the patient. Structurally tested for upto 100 kgs user weight

## 2. hip

### 4-Bar Hip Joint

A 4-Bar linkage joint that tracks hip movement to optimise gait. The hip folds anteriorly to ensure good sitting comfort and cosmesis.

Features:

- 130 degree flexion/extension
- Alignment allows adjustment in all planes
- Optional extension stop grades

### H1S Single Axis Hip Joint

Features:

- Polycentric hip joint makes it more stable
- Super light weight design
- Maximum load capacity of 100 Kgs

## 3. Feet

### echelonVT T

Features:

- Adaptive dorsi-flexion and plantar-flexion
- Dorsi-flexed toe for swing phase
- Rotation and vertical shock absorption
- Tri-pod action for conformance and vertical compliance
- Smooth and fluid hydraulic and spring action
- Responsive e-Carbon foot springs
- Footshell and glide sock included

### eLan

Features:

- Microprocessor controlled terrain response
- Adaptive dorsi-flexion and plantar-flexion
- Variable response to speed changes
- Foot response increases as incline increases
- Sensors initiate change instantly
- Batteries contained within ankle
- No ungainly battery or program devices to be attached proximally
- Footshell and glide sock included

### echelon

Features:

- Independent hydraulic control of plantar and dorsi-flexion
- Biomimetic design simulates natural ankle motion
- Toe up for swing through clearance
- Natural toe position for sitting
- e-carbon heel and toe springs
- Elegant and compact for cosmetic finish
- Footshell and glide sock included

### Multiflex

Features:

- Multi-axial function
- Low profile
- Sandal toe

**Avalon**  
Features:  
Range of true motion, not just foot deflection  
Hydraulic ankle provides plantar and dorsi-flexion.  
Ergonomic keel for ease of rollover.  
Single valve adjuster Sandle toe allows different footwear styles.

**elite bladeVT**  
Features:  
Powerful and dynamic forward progression  
Precision machined spring for vertical compression and axial rotation  
Controlled and efficient energy return  
Independent e-carbon foot springs  
Slimline design is easy to finish  
Footshell and glide sock included  
Low Profile or full length pylon

**Aqualimb**  
Features:  
Integral shin and cosmesis  
Rapid assembly  
Full alignment device included  
Anti-slip tread pattern on sole

**DR2**  
Features:  
User adjustable response  
Multi-axial function  
20mm  $\pm$ 15mm heel height range fixed at limb assembly  
Full length toe lever

#### 4. Adaptors

**Brio**  
Description:  
Unique push button device that allows the user to adjust heel height for shoe changes or bare foot walking. 25mm range of adjustment

**Ankle Torque Absorber**  
Description:  
Ankle torque absorber with 90° rotation. Ideal for golf.

### TT Pro

#### Description:

This award-winning design continues to add a little magic to prosthetic gait. It cushions shock and shear forces caused by vertical and twisting motion and protects the skin interface from abrasion and discomfort.

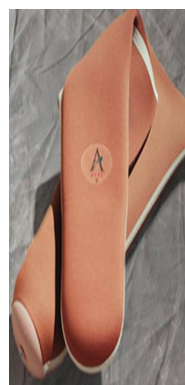

## 5. liner

### General Purpose Locking Gel Liner - GPDT

#### Features:

- Distal end encapsulation retrofits most competitors' liners
- High performance fabric with reinforced seams for maximum durability
- Available in 3mm uniform and 6mm uniform thicknesses
- Slightly tacky feel of the gel liner minimizes bunching in the popliteal region
- Offered as either a locking or cushion liner

### Extreme Locking Gel Liner - AKDT

#### Features:

- Limited vertical stretch reduces movement of redundant tissue
- High circumferential stretch to assist with form fitting
- Wider distal end for ease of donning
- Offered as both a locking and cushion liner
- Distal ends are proportionate to the size of the liner
- Extended warranty with the purchase of two liners
- Available in two different thicknesses: 3mm uniform, 6 mm uniform

### Easyliner Super Stretch Gel Liner - ELPX

#### Features:

- Customized fit without the cost of inconvenience.
- Beneficial for diabetic and/or scar patients.
- Able to fit virtually any type of user
- Offered in 6mm uniform thickness
- Longer lengths to accommodate more users

## Upper Extremity Prosthesis

### 6. Hand

Cosmetic  
Features:  
Adjustable fingers  
(Integrated fingers wiring  
or upgradable to hinged  
fingerjoints)  
Innerhand foam fillings  
Integrated wrist connector  
(M12x1.5 or 1/2"-20, internal or  
external threaded stud)

Myo Electric  
Description:  
Innovative, built-in electronics  
provide a choice of nine  
control modes for the hand,  
selected using the dial switch  
feature. The on-board system  
also includes an electronic  
'gear change' allowing power  
to be stored and released on  
demand.

RSLSteeper Select Myo  
Electric Hands are controlled  
with Select Myo electrodes  
or switch inputs and the  
electronics equipped with  
patented Powerforce™  
Supercapacitor technology  
(sizes 71/4 – 81/4) to provide  
efficient control and power  
conservation

Be bionic  
Features:  
Individual motors in each fingers  
Powerful microprocessors  
14 selectable grip patterns  
Proportional speed control  
balance software  
Selectable thumb options  
Auto grip  
Foldaway fingers  
Durable construction  
Innovative Palm design  
Soft finger pads

### 7. Elbow

Automatic  
One of the most durable elbow  
units currently available, the  
RSLSteeper automatic elbow  
is available in 3 sizes, has 7  
lockable positions and also  
incorporates a lockable humeral  
rotation feature and a free  
swing option is also provided.  
A prefabricated laminated  
forearm is also available in 4  
shades and 4 wrist diameters to  
complete the limb prosthesis.

Manual  
Description:  
A manually operated adult  
prosthetic elbow system,  
supplied complete with  
forearm in a choice of four  
skin shades. This unit has 5  
lockable positions and 100  
degrees of humeral rotation,  
and may also be locked in the  
free swing position.

### Children

#### Description:

Available in two paediatric sizes, the Childs Friction Elbow provide parent adjustable friction Control of both flexion/extension as well as internal and external rotation. Side bars are provided to allow the attachment of a custom made forearm.

## Prefabricated Orthosis

### 8. AFO

#### YPSILON

##### Features:

Provide gentle support to patients with less severe ankle/foot dysfunction  
Greater instep clearance and allow more medio-lateral and rotational ankle movement.  
No tibial pressure

#### Blue Rocker

##### Features:

It provide extra stability because of extra rigidness  
Footdrop from neurological disorders such as stroke, MS, post-polio  
Footdrop from Myelomeningocele, Cerebral Palsy, Muscular dystrophy  
Bilateral deficit such as CMT, Neuropathy  
Severe spasticity  
Partial foot amputation.

#### Toe Off

##### Features:

Dynamic response, light weight carbon composite orthosis with toe - lift action to help neurologically impaired patients to ambulate with closer to normal gait  
Individuals with gait impairment due to foot drop now enjoy a higher quality of life, thanks to the stability and dynamic assist provided when wearing this patented carbon composite orthosis

## 9. Knee Brace

**OA Lite**  
Features:  
Single upright is malleable to allow further load adjustments with thigh and calf paddles to mitigate hinge rotation  
Pre-loaded hinge (up to 6° of correction) incorporates flexion and extension control  
Arthritis friendly with reinforced strap ends, thigh grip, and pull loops  
Breathe-O-Prene® fabric eliminates skin irritation and provides comfort by wicking away moisture

**OA Everyday**  
Features:  
3 point load shifts compressive knee joint forces from the degenerative area to the healthy compartment  
Telescoping Condyle Pad (up to 6° of correction) enables patients to adjust load according to activity level  
Swiveling, quick release buckles facilitate ease of application/removal and accommodates leg movement  
Short brace-length (12.5") accommodates short inseams

**Combo**  
Modular components allow you to accommodate variances in thigh and calf circumference.  
Low Profile  
Light Weight  
Easy to don and doff  
Easily removed when wearer is relaxing

**C.H.E.C.K**  
Comfortable Hyper-Extension control Knee  
Low Profile, weigh only 0.33 Kg  
Effectively control hyper-extension while allowing full knee flexion  
No flexion limitation  
Easy to Don and Doff

**Spinal Orthosis-Boston Brace**  
Features:  
No need for casting, less burden for the patients  
Significant time shorting of manufacturing : no casting, no modification/manufacturing of positive model, no moulding  
PP material only, outlook is not obviously conspicuous  
Compliance is much better.  
Brace is named according to the highest curve being treated by the brace like Lumbar brace, Thoroaco- Lumbar brace and Thoracic brace

**Hip Orthosis**  
Features:  
Plastic pelvic section extends from L2/L3 to the coccyx, providing maximum torso support for candidates with flaccidity or very limited trunk control  
Single strap fixed front closure to secure torso support  
6 mm (size1) and 7 mm (sizes 2-4) diameter uprights  
Increased posterior and side support  
Proven results in several different independent studies  
"Childproof" thigh cuff closure

---

## 10. Gel & Silicone

### Walk Straight Silicone Heel Wedge

#### Features:

Used to help maintain balance  
Posted design minimize pronation,  
flat feet or genu valgus knee  
conditions

Provide long lasting comfort and  
will not lose its shape like foam  
Comes in Small Medium & Large  
sizes

### Full Length Insole

#### Features:

Multi - density silicone  
absorbs shock under  
high pressure areas while  
supporting the rest of the  
foot.

Ideal as a replacement for  
shoes with removable insoles  
Relief for heel, arch and foot  
problems

Multiple vents enhance air  
circulation

Comes in Small, Medium,  
Large & X Large sizes

### Folding Walking Stick

#### Features:

Excellent strength  
Fine finishing  
Longevity

### Walking Stick

Our offered range is especially designed to provide complete support and comfort to old age people, patients and handicapped persons. These are offered in different designer handles and heights that help in meeting the needs and requirements of customers.

### Height Adjustable Crutches

#### Features:

Adjustable height.  
Robust designs.  
Durability

### Nut Bolt Walkers

We put forth an immaculate range of Nut Bolt Walkers for our clients. These can be used for fixed movement by pulling the knobs situated besides the Walker. Our Walkers are designed for reciprocal (alternate) and fixed movement. This provided complete stability and maxim freedom of movement.

### Folding Adult Walkers

We deal with all kinds of Folding Adult Walkers which is available in various models. Height-strength, oxidation metal surface folding and easy to carry. 4 levels is height adjustment

### Shower Chairs

#### Features:

Light weight  
Anti skid legs  
Adjustable height with back support

### Folding Wheelchair

#### Features:

Easy to fold.  
Precisely designed.  
Highly comfortable.

**Crutches Cover**  
Features:  
Corrosion resistant  
Reliable  
Sturdy construction.

**Crutches Hand Grip**  
Features:  
Durable  
Better grip  
Premium quality

**Crutches SU**  
Features:  
Reliability.  
Sturdy construction.  
Accurate dimensions.

**Elbow Stick**  
We supply Elbow Crutches which are used by aged people and patients. It provide the patient with extra stability to enable normal movement. These elbow crutches are developed using quality raw material like MS steel pipe, stainless steel pipe and aluminum.

**Tripod Walking Stick**  
Features:  
Comfortable grip  
Strong construction  
Defect free

**Quadripod Walking Stick In Plate**  
These are fabricated by using high grade quality steel, brass, wood, plastic and other materials. Renowned for features like durable finish and high strength. We are offering these in different shapes and sizes.

**Quadripod Walking Sticks**  
Features:  
Reliable  
Durable finish  
Sturdy construction.

**Grab Bar Urinal**  
Features:  
Standard quality  
Robust structure  
Defect free

### Key Persons:

Mr. Vishal Bansal

Year of estb.: 2012

**Four Post Cervical Brace**  
Size: Pediatric, Adult  
Features: Made of light weight, malleable aluminum for customized fit. Adjustable to match the height requirement of the patient. Foam padded cushioning for proper comfort.  
Applications: Used for immobilization of cervical spine in post operative cases.

**Somi Brace (Sterno-Occipital Mandibular Immobiliser)**  
Size: Universal  
Features: Foam padded, rigid and light metal construction with malleable plates at chin, occiput chest and back to fit on patients. Three sets of straps and velcro provided at chin shoulder and chest level.  
Applications: Used in cases of post trauma cervical dislocations, pre and post surgical care, post halo support and immobilization to fractured mid and lower cervical spine.

**Body Belts & Braces-Taylor Brace / Dorso Lumbar Brace**

**Cervical Collar Hard**

**Cervical Immobiliser / Philadelphia Collar**

**Cervical Collar Soft**

### Elastic Knee Support With Hinges

Size: S, M, L, XL

Features: Wide elastic base with velcro buckle combination to give proper compression. Patellar opening provided. Two lateral hinges provided. Anterior patella hole provided.

Applications: Mild compression support for strains and sprains. Post operative support. Arthritis. Sports injuries.

**Folding Walking Stick**  
Ideal for reliable support without the cumbersome carrying of a fixed stick - just flip it down at a moment's notice to leave you hands-free for the shopping.

**Wheel Chair**  
Features:  
High comprehensive strength  
Smooth finish  
Sturdiness

**Walking Stick**  
Features:  
Excellent designs  
Easy to use  
Comfortable

**Foldable Wheel Chair**  
Features:  
Easy foldable  
Swing type footrest  
Anti tip wheels

**Hearing Aid**  
Features:  
Truly Binaural  
Adaptive Intelligence  
Contour Design

**Ortho Morning Walker**  
Features:  
Light weight  
Reliable  
Fine finish

**Foldable Walker**

**Cervical Collar**  
Features:  
Covered with soft cotton  
Set with easy loops and fasteners  
Splint inside the collar provides stiffness

Power Wheel Chair with Safety Lamp  
Code : HHC-255  
Joystick made in UK by P.G. Drives Model VSI  
Supported with Night Lamp. Shock absorbers  
Adjustable Armrest Pad, Detachable Sideboard.  
Adjustable Angle Backrest. Reclining facility  
Maximum Distance covered on Single Charge: 20 km.  
30KMS APPROX. (DEPENDING ON THE WEIGHT).  
2 X 300 WATTS motors, 12 X 2V 35 AMP batteries.

Power Wheel Chair  
Code : HHC-257  
Specification:  
Joystick made in UK by P.G. Drives Model VSI  
Maximum Distance covered on Single Charge: 20 km.  
Adjustable Armrest Pad, Detachable Sideboard.  
Speed Range: 1-6 km/hour.  
Climbing Power: 12°.  
height adjustable armrest and backrest  
Solid wheel, PU insert electric/manual reduction box  
Battery: 28AH, 12V x 2.,  
Motor: 168W x 2.

Power Wheel Chair  
Code : HHC-259  
Joystick made in UK by P.G. Drives Model VSI  
Motors made in Taiwan, 2 X 300 WATTS motors, 12 X 2V 35 AMP batteries.  
Outside width : 65cms  
Front Caster: 20 cms  
Rear Castor: 31 cms PU Solid rear Wheel  
LOAD CAPACITY : 110KGS

Wheel Chair  
Code : HHC-243  
Specification:  
Steel Material Chrome Plated.  
Foot rest - swingaway  
Fold down back.  
24" rear wheel  
fornt castors 7"  
Seat width 46cms.

**"SUVIDHA" Wheel Chair**  
Code : HHC-212  
Specification:  
Fodable Seat, Width 45cms,  
PU Padded arm, fixed foot rest  
24" spoke rear wheels with  
double ball bearings and  
safety brakes with shoe.  
Solid tyres & safety brakes with  
shoe.  
7" front wheel with bearings.  
Imported nylon coated padded  
fabric seat.  
Epoxy powder coated finish.

**Attendant Propelled  
(Push-me) Wheel Chair**  
Code : HHC-211  
Specification:  
Fodable Seat, Width 18",  
PU Padded arm rest, fixed foot  
rest  
12" plastic moulded rear  
wheels with bearings,  
Solid tyres & safety brakes  
with shoe.  
7" front wheel with bearings.  
Imported nylon coated  
padded fabric seat.  
Epoxy powder coated finish.

**Bariatric Wheel Chair**  
Code : HHC-219  
Specification:  
Seat Width 30" (762mm) with 4"  
foam seat.  
Imported Nylon Coated Padded  
Fabric Seat.  
24" Rear Wheel with double  
Ball Bearings with quick release  
excel.  
6"x 1/2" Front Wheel with Double  
Ball Bearings.  
Safety Belt  
Fixed Arm Rests with P.U. Pads.  
Solid Tires. Safety Brakes with  
Shoes.  
Epoxy Power Coated Finish.

**Recliner Wheel Chair**  
Code : HHC-215  
Specification:  
Folding / Seat width 18" (45  
cms).  
Elevating foot rests with calf  
pads.  
Head support at top.  
24" spoke rear wheels with  
double ball bearings  
7" x 1" front wheels with  
double ball bearings  
Reclining back up to 30° to  
180°  
Detachable arm rests with P.U.  
pads  
Solid Tyres. Safety brakes with  
shoes, Safety belt.  
Imported nylon / Coated fabric  
seat  
Detachable extended back.  
Epoxy Power Coated Finish.

**Non-Fodable Wheel Chair**  
Code : HHC-216  
Specification:  
Non-Fodable Seat, Width 18",  
PU Padded arm rest, fixed foot  
rest  
24" Rear Wheel with Bearings,  
Solid tyres & safety brakes with  
shoe.  
7" front wheel with bearings.  
Imported nylon coated padded  
fabric seat.  
Epoxy powder coated finish.

**Wheel Chair - Alluminium**  
Code : HHC-246  
Specification:  
Aluminum Special Functional Epoxy.  
Detachable Arm rest or foot rest.  
Seat & Back Upholstery made of colored Leatherate.  
8" Front wheel & 24" rear meg wheel.  
Seat width 46cms & overall width 65 cms.

**Reclining Wheel Chair**  
Code : HHC-245  
Specification:-  
Seat width is 18.5" inches  
Seat & Back Upholstery made of colored Leatherate.  
lightweight and will not rust  
Detachable armrests and elevating footrests  
Back can be reclined, whole wheelchair can be adjusted up to 180 degrees  
Can carry weights of up to 115 kilograms  
With two handbrakes for the wheels to keep the wheelchair in place

**Invalid Wheel Chair**  
Code : HHC-244  
Specification:  
Steel Material Chrome Plated.  
Seat & Back Upholstery made of colored leatherate.  
8"x1" Front wheel & 24" rear MEG wheel.  
Fixed Arm rest & Aluminum foot rest.  
Seat width 46cms & overall width 65 cms.

## Wheel Chair Accesory:

**Wheels :**  
(1) 12" MAG PU tire rear wheel (2) 14" MAG pneumatic tire rear wheel (3) 16" pneumatic tire rear wheel (4) 24" PU tire driving wheel (5) 24" rubber tire driving wheel (6) 24" pneumatic tire driving wheel (7) 24" MAG driving wheel (8) 24" quick release driving wheel

#### Taylor Brace

Item Code: M1019

Taylor Brace is a light weight spinal support, covers all vertebrae of spinal cord, supports and immobilizes the spine in neutral position, and allows a firm body movement.

Features:-

- Customization
- comfy fabric
- adaptable sizes
- Anatomically design

#### Cervical Collar Regular

Item Code: M1104

A cervical collar (also neck brace) is an orthopedic medical device used to support a patient's neck and head. It is also used for those patients who have had traumatic head or neck injuries. Cervical collars are incorporated into rigid braces that limit the head and chest together.

#### Specifications:

- Size: 560 x 700 x 900 mm
- Net Weight: 18.5 kg

### Tilt-In Space Wheelchair

Item Code: HT-1243

Tilt-in space wheelchairs are equipped with change of orientation feature which redistributes pressure from one area to another different area (e.g. from posterior thighs to posterior trunk and from buttocks to head) and maintains physical angles at the hips, knees and ankles.

### Manual Wheelchair - Foldable

Item Code: HT-1241

These are the wheelchairs which require human power for the movement. Manual wheelchairs are usually propelled by its occupant, by turning the large rear wheels. As you can see in the picture the rear wheels has hand rims which facilitates easy gripping to move the wheel chair. This type of wheel chair is foldable for easy storage in vehicles, work place or at home.

### Stand-up Wheelchairs

Item Code: HT-1247

This is the manual wheelchair with powered stand-up feature.

### Bed Wheelchairs

Item Code: HT-1242

Bed Wheelchair facilitates the disabled people to go in reclined position. This avoids stress on back and gives great relief.

### Commode Wheelchairs

Item Code: HT-1244

We offer special purpose commode wheelchairs. This is designed for physically challenged or elderly people. Commode wheelchairs can be used for indoor toilet purposes. This is a manual propulsion wheel chair.

### Compact Wheelchairs

Item Code: HT-1246

Compact wheelchair is an easy mobility wheelchair for physically challenged and elderly people. As the name says it is compact, foldable and easily cariable in a specially made bag like golf bag.

### Deluxe Wheelchairs (Rear Wheel Drive)

Item Code: HT-1248

Deluxe wheelchair is a powered rear wheel drive wheelchair. This is fitted with bucket seat to give higher comfort to users. The motors, wheels and base frames are covered. Seating has the manual reclining back rest. This is more suitable for luxury or deluxe usage.

### Attendant Wheel Chair

Item Code: HT-1251

- The model designed to operate by attendant
- Foldable drop back handle for quite compact action
- Folding action
- Lifter rod provided
- Safety belt provided
- Maintenance free solid wheels
- United lever brakes system

### Ground Mobility Device

Item Code: HT-1249

Ground mobility device stands just four inches from the floor and this wheelchair is extremely useful for people who are either heavy weight or do not have assistance to be lifted on to wheelchairs. This is very helpful for the people who have lost both the legs or the one who just crawls.

### Pediatric Wheelchairs

Item Code: HT-1250

### Tennis Wheelchairs

Item Code: HT-1245

Tennis wheelchair is one of the forms of tennis adapted wheelchair for those who have disabilities in their lower part of bodies.

### Foot Drop Splints

Item Code: HT-1131

Foot Drop Splints Features Lends support to flaccid Drop Foot and Polio Foot with mild Spasticity Cosmetically Superior Light Weight

Available in two sizes:

- Large (Adult)
- Extd. Large (Children)

### Cockup Splint

Item Code: HT-1133

Wrist support anatomically shaped with adjustable aluminum splint. It combines the therapeutic requirements for effective support with the product benefit for comfortable fit. The material is breathable and elastic. Individual adjustment with rounded-off Velcro fasteners. Effectively maintains wrist in dorsiflexion while allowing natural extension of fingers. May be used following cast removal or for strains and sprains. Contoured steel stays provide firm immobilization.

### Leg and Knee Orthotics

Item Code: HT-1134

We are betrothed in manufacturing orthotics for the leg and knees orthotics. The orthotics is mostly recommended by the physiotherapists for better positioning of the leg and knee. We use superior quality foam and cushions to fabricate this orthotics. Our team of limb specialists and designers has the experience of designing simulated limbs for the missing body parts and are very competent to design and manufacture the orthotics for legs and knees. We do not conciliate with the quality of the product and the predefined parameters for enhanced quality.

### Limbo Sacral Brace

Item Code: HT-1135

We offer an extensive range of Limbo Sacral Braces that are intended to restrict the side bending (side-bending) motion and forward/backward flexion and extension. These are manufactured using highly durable quality components to make certain the longer life. The raw material is sourced from the reliable vendors of the industry, who are highly acclaimed for providing quality raw material. Our clients can avail these as per their requirements and can be customized to fit the wearer. Moreover, these can be availed at leasing industry rates.

### Finger Dynamic Splint

Item Code: HT-1136

We offer wide range of Finger Dynamic Splint. It is Well padded, unbreakable, washable, reusable and economic. Finger-thumb attachments are optional. Adjustable wrist-tension by detaching one or two springs.

### Special Knee Brace

We deliver high quality Special Knee Brace at very reasonable price in market. These are available with mediolateral bars, rigid posterior bars and Velcro closures that provide moderate immobilization to the weak knee joint post injury or surgery. We offer these to our valued client at market leading prices and with the time stipulation. Backed with industrial experience and cutting edge technology, we offer a unique range of premium quality Knee Brace Special.

Specifications:

Weight: 90 g approx

Material: Neoprene

### Limited Motion Knee Brace

We are engaged in offering broad range of superior quality Limited Motion Knee Brace to match up with the demands of our respected clients. These knee brace helps in offering range of motion and flexion or extension locking in 10-degree increments. It also consists of unique locking system along with lid for protection. Our range of product is highly recommended for controlling mobilisation after Meniscus tears, ligament tears (especially ACL&; PCL) and dislocations.

Specifications:

Extension locking in 10-degree increments

### Premium Knee Brace

We are well known manufacturer of Premium Knee Brace, these are manufactured from high grade quality material. Our company designs and supplies a gamut of Knee Brace Premium devices made up of high quality raw material. Designed to support knee joints after any knee injury or fracture, these braces are provided with flexion extension adjuster for comfortable fit. Working under expert supervision, our engineers design these braces to follow Range of Motion (ROM) and fixed angle flexion to provide complete knee immobilization to the patients.

Specifications:

Weight: 70 g

Material: neoprene

### Osteoarthritis Knee Brace

Item Code: HT-1137

Osteoarthritis Knee Brace

If you are looking for an easy-to-fit, off-the-shell ligament brace for low impact activities of daily living, then the Paradigm OTS is just what you need. It has a large "open window" frame design, a contoured medial flare, flexible sub shells that comfort to patient anatomy, an Adjustable ATS Strap & condylar ergonomics, paradigm OTS is engineered for comfort & compliance.

**Knee Immobilizer Brace**  
Item Code: HT-1138  
Knee Immobilizer Brace

### LARYNGECTOMISED PERSONS

Get Early Voice Restoration Through Electro-Larynx Instrument

- Small Size
- Lighter Weight
- Separate volume and Pitch controls
- Works on ordinary/rechargeable 9 volt battery cell easily available worldwide.
- Facility to energise through an AC battery adoptor

### TECHNICAL DATA:

Weight Unit 100gm

Battery 30gm

Length - 138mm

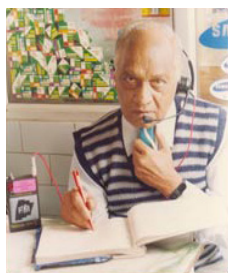

Width Top 44mm

Bottom 34mm

Height 22mm

The ELECTRO-LARYNX speech aid offers the following benefits:

- The most natural sounding speech aid available.
- The artificial larynx with separate tone control and volume control.
- The widest tonal range available in an electrolarynx-bar none! Even wider than Servox.
- Best sound quality available instrument.
- Uses convenient 9 Volt Battery.
- Smallest 9 volt speech aid currently available.
- Light weight-only 4.5 ounces!
- Durable impact resistant materials.
- One of the most comprehensive 3 months warranties comes standard at no extra cost.
- LISTEN and compare to the common brands.

### Speech enhancement Device

It has been designed to assist Laryngotomees as well as all those people with temporary or permanent weak voice, to increase the voice sound level of their :-

- Oesophageal speech
- Electro-Larynx Speech
- Weak / Low natural Speech

The Speech Enhancement Device reduces the fatigue of forced speech thereby enables the speaker to be heard in moderately noisy situations like wedding ceremonies, functions, office atmosphere, market places, court rooms, classrooms (of schools and colleges for teachers, business, houses factory or in moving vehicles/trains etc.

Main Features of Speech Enhancement Device :-

- The battery chamber is easily accessible for smooth battery replacement
- The head set is light weight and is supplied with a built in microphone.
- The head set allows free hand free operation without any discomfort of holding mike with one hand.

### SOMI BRACE

FEATURES : Ride two-post, lights metal construction with malleable. Plants for the chain occiput, chest & back for proper contouring and fit on patient- three seats of straps provide proper immobilization and secured fit chin straps prevent rotation and lateral bending of the neck, Shoulder straps prevent brace migration on usage. foam padding provides cushioning comfort during extended use.

APPLICATIONS : Used for posttraction normal cervical spine alignment support in the case of dislocations and for support and immobilization to the fractured mid and lower cervical spine during pre and post-operative conditions

### HARD CERVICAL COLLAR (Adjustable)

FEATURES :Made of high -density polythene sheet. Two piece height adjustments to maintain desired flexion or extension. Banian foam padding for comfort. velcro clasures to easy application removal and adjustment,Holes.Provided for air circulation.

APPLICATIONS : Cervical, disc disease.Cervical spondyloysis stabilization or hyperextension of the cervical region. Torticolles.

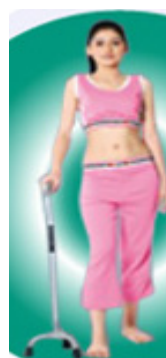

SIZE : Small, Medium, Large

### WRIST BRACE

FEATURES : Adjustable fastening permits variable degree of support. Malleable pre shaped splint keeps forehead at angular position to the wrist as is recommended for correcthealing.

SIZE : On size fits all

### TRIPOD STICK (REGULAR)

FEATURES : Lightweight sturdy Aluminum construction pushes button adjustment to fit any sizes.

SIZE :  
To fit any sizes.

#### KNEE BRACE (SHORT)

##### FEATURES :

Made of high quality, breathable, foam fused fabric to provide excellent comfort. Two lateral & three Posterior rigid yet light-metal splints, precontoured for good support to maintain 10-15 degrees of knee flexion for easy tow clearance during gait cycle (walking). The splints are removable and can be bent or straightened as per requirement Buckle and velcro closures above and below help secured fitting.

#### KNEE BRACE (LONG)

##### CODE NO.608

##### FEATURES :

Made of high quality, breathable, foam fused fabric to provide excellent comfort. Two lateral & three Posterior rigid yet light-metal splints, precontoured for good support to maintain 10-15 degrees of knee flexion for easy tow clearance during gait cycle (walking). The splints are removable and can be bent or straightened as per requirement Buckle and velcro closures above and below help secured fitting.

##### INDICATED FOR

Protecting the injured knee joint in emergency. Stabilizing surgically or non surgically treated knee joint for strain, sprain and fracture dislocations. Early cast removal. Use during physiotherapy

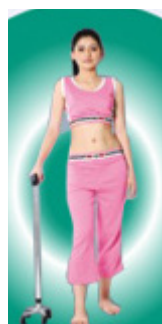

#### CRUTCH (REGULAR)

##### CODE NO. 1006

##### FEATURES :

Made of lightweight, study plastic cated aluminium tube. padded axially for comfort, Easy adjustment in height. Suction rubber tip for better grip over the floor.

#### QUADRIPOD STRICK (DELUXE)

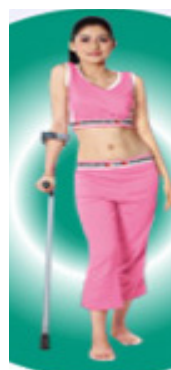

##### CODE NO.1003

##### FEATURES :

Lightweight sturdy Aluminum construction pushes button adjustment to fit any sizes.

##### SIZE :

To fit any sizes

#### ELBOW STICK (REGULAR)

##### FEATURES :

Made of study, Plastic coated, mild-steel tube, light weight. Telescopis height adjustment with press button arrangement. Padded forearm cuff for better stability for comfort. Suction rubber tip for better grip over the floor.

SIZE : Child,Adult.

#### FOLDING WALKER

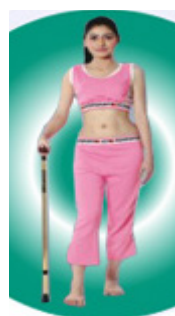

##### FEATURES :

Lightweight, made of Aluminium, fully adjustable and folfable walkerette.

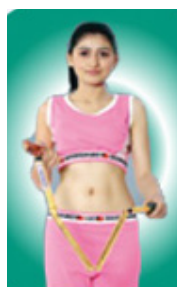

SIZE : Adult and Child Sizes

**ADJUSTABLE WALKER  
FOLDING/WHEELS  
CODE NO.1010

### Walking Sticks

We offer an ample range of walking sticks, which provides complete support to the patients. We use quality raw material such as MS steel pipe, stainless steel pipe and aluminum, these sturdy are available in different modes. We produce these sticks as per the specific details of our clients provided to us during the initial deal. These are available in various shapes and designs.

### Invalid Walkers

We are engaged in manufacturing a wide range of Invalid Walkers that is light in weight and provides the comfort required for the patient. We design these walkers exclusively for aged and handicapped people. The specialties of these walkers are that it can be adjustable as per the requirements of the patients and can be used for both, outdoor and indoor purpose.

### Mobility Crutches

Crutches are mobility aids used to counter mobility impairment or an injury that limits walking ability. We produce these crutches as per the patient's specifications and keeping the comfort level in mind. These are available in an ample range of design, shapes and sizes.

### Stair Evacuation Chair

#### Specifications :

The load capacity of the chair is 150 Kg.  
Width: 550 mm  
Length: 1110 mm  
Length with opened handles: 1450 mm

### Evacuation Chair

Height open: 1365 mm  
Height folded: 945 mm  
Width : 500 mm  
Length: 920 mm

### Stair Chair

The spencer 425 transport chairs is a medical device designed and created to permit the transport of patients in the sitting position. These model can be used in all situations in which a confined space requires devices with small dimensions.

### Military Stretcher

#### Features :

Frame: aluminium alloy  
Military Stretcher support: extruded aluminum alloy  
Frame and pantograph: extruded aluminium alloy  
Locking levers: stainless steel  
Lubricant-free bushings: teflon and polycarbonate

### Cervical Collar

#### Cervical Collar

It minimizes pressure on the carotid, guarantees X-rays, CAT scan and MRI investigations compatibility, ensures use even in extreme temperatures, optimizes the washing and sanitization.

Five sizes available:

- Nec York size 1 (infant)
- Nec York size 2 (pediatric)
- Nec York size 3 (neckless)
- Nec York size 4 (short)
- Nec York size 5 (regular)

### Adjustable Cervical Collar

A worldwide premiere, the first industrial cervical collar manufactured with a new moulding method called comoulding which unite two different materials: one semirigid and structural, the other soft and comfortable.

#### Static Foot Drop Splint

Code : 102A

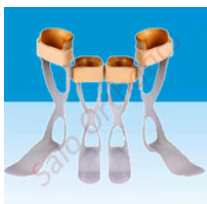

The static drop foot is designed with comfort it include 3-dimensional padding throughout the shell and adjustable flexion straps that control inversion / eversion amount of stretch provided for effective treatment.

#### Foot Drop Splint with Detachable Bar

Code : 102B

Our Foot Drop Splint with Detachable Plate is helpful in gait abnormality in which the dropping of the forefoot happens due to weakness, damage to the peroneal nerve or paralysis of the muscles in the anterior portion of the lower leg. It serves to raise the foot high enough to prevent the toe from dragging and prevents the slapping. It helps accommodate the toe drop. Helpful to the Patients with painful disorders of sensation (dysaesthesia of the soles of the feet).

#### AFO Leaf Type Splints

Code : 101

This AFO from SALO Orthotics aids in swing phase toe clearance and reduce plantar flexion impact in early stance and allows natural heel strike. Its thin walled polypropylene construction has been optimized for increased resilience. The unique comfort curve on calf muscles reduce pressure point and muscle tension.

#### AFO Splints With Plate

Code : 111

An injection moulded polyethylene splint providing dorsiflexion assistance and some lateral stability for the entire foot ankle area.

#### Knee Valgum / Varum Brace

Code : 119

### Push Knee Splint

Code : 118

To release flexion contracture to prevent buckling of the knee and to stabilize it. Also used post-operatively Works to treat joint stiffness and improve range of motion.

### PTB with Foot Plate

Code : 116

PTB Brace With Foot plate is used for lower one third tibia and fibula and/ or fibular fractures for limiting ankle movement viz. Inversion, eversion and plantar flexion. Foam Lined, preformed PTB Brace provides intimate contact needed for effective support in tibial fractures. A bilateral upright foot component to add medial lateral support as well as prevent distal slippage.

Measure Length from superior border of patella to mid-level malleoli.

Brace suspension and ankle stability controlled with single axis footplate.

### Mermaid Splint

Code : 120

This Splint is mainly useful when the disease is active and deformity is slight. It is very effective in children in preventing deformities concerning lower limbs. This Splint is for correction of axial deformities of the knees, keeping them solidly in the night with the help of our splint.

### AFO Static Foot Drop Splints

Code : 104

The AFO Static is used to support the weakened or paralyzed body parts in particular position like Drop Foot from a stroke. The AFO Static can be designed to help control adduction and abduction of the forefoot. AFOs Static, are devices that hold joints in constant position and are made of rigid materials.

### Articulated AFO Splints

Code : 103

Articulated Ankle-Foot-Orthosis (AFO) are common devices fabricated at Sterling Surgical. Quite often prescribed for musculoskeletal issues due to Multiple Sclerosis, Cerebral Palsy, Stroke, Spina Bifida or Drop foot. Designed with hinges to allow range of motion, or can vary from flexible to stiff depending on the condition.

### Ankle Brace

Code : 113

Ankle Brace is used for the treatment of Ankle Sprain, it also compresses & protects the lower leg and Ankle within the regular Shoe.

### W.H.O. (Full Cock-UP)

Code : 206

One of the most popular splints maintains a functional position of the hand and wrist to keep the wrist and fingers in extension that is in functional position.

### Dynamic Extension

Splint Code : 204

Our Dynamic Extension Splint is an extension assist splint to bring mobility to the interphalangeal joints.

### Elbow Extension Brace

Code : 121

Elbow Extension Brace is designed to be used in the injury caused when an elbow joint is forced backwards beyond its normal range of motion, resulting in damage to the soft tissues in the joint. Three point pressure pads articulate with each other to form the elbow extension and support joints, keeping them in position and, in some cases, limiting excessive movement

### Cock-UP Wrist splint (Neutral/Extension)

Code : 205

Ideal for sprains, strains and control of carpal tunnel syndrome symptoms. The ability to fit your wrist and hand snug and tight, for total support. Palmar and dorsal stays control wrist flexion, while the lightweight design is perfect for all day use. Adjustable straps secure the support around your wrist.

### Arch Support

Code : 105

#### Features & Benefits

A replacement arch insole that incorporates a cupped heel and arch support and featuring shock absorbing material under the heel to provide an extra layer of protection where you need it most. Provides shock dampening and cushioning for the entire length of the foot.

Ideal for all-day protection to relieve pain and fatigue in the feet, knees, hip and low back.

For superior protection from the jarring shock caused by the foot impacting hard surfaces. It is a smooth, non-piling, easy-to-clean Arch support.

### Arch Support with C&E

Code : 106

#### Features & Benefits

The problems associated with over-pronation are prevented.

The unique design aligns the ankle and supports the foot from Mid-Stance to Toe-off.

Helpful in Flat Foot, Knock Knee, Knee Pain, bow legs, Calf muscle pain and plantar fasciitis

Shock absorbing foot bed with a mild arch support.

Protects foot from shear, torsion and vertical shock.

Provides adjunctive therapy following spinal adjustments.

Alleviates foot, leg, hip and low back pain resulting from heel strike.

Protects soft tissues and joints.

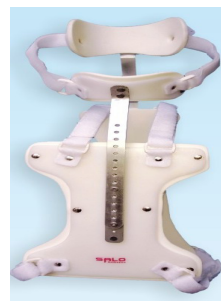

Protects arthritic and geriatric joints.

### TLSO Hyperextension (ASH Brace)

Code : 203

This TLSO is a unique prefabricated for post-operative, post-traumatic, or chronic spinal pathology. The Dual TLSO provides full-circumferential rigid support from the scapular thoracic region (T2/ T3) of the spine down to the Sacroccygeal junction (S1). The TLSO design creates a 3-point force system, consisting of a posteriorly directed force from the sternal and pubic pads, and an anteriorly directed force from the thoracolumbar pad. The pressure created restricts forward flexion and encourages a hyperextension posture. This posture increases lumbar lordosis and resists lateral and rotary movements of the spine and mild scoliosis.

### Somi Brace – 211

#### Features

Controls lateral flexion, extension and rotational movements of cervical vertebrae  
Helps in anterior and posterior skeletal point system

Used in improper neck curve, neck pain and neck deformity  
4 piece construction: Sterno (chest bone support), occipital (back of head support), mandibular (lower jaw and chin support) and cervical & thoracic support

Easily shaped and fitted to patient's form with a wide range of possible adjustments.

May be fitted onto the patient when they are lying flat

It is used minimally unstable fractures.

Designed in high quality plastic & foam padding

Light weight, airy, highly adjustable and easy to install

### BPA - ONE WINDOW SERVICE FOR PERSONS WITH DISABILITIES

Blind People's Association is a professional organization which believes in providing equal opportunities to all categories of people with disabilities. Consistent with the philosophy, it works for providing education, employment opportunities, equal rights and quality life for them. BPA, understands that gainful employment plays an essential part in the life of a person because it gives him status and binds him to the society. Acceptance of disabled persons at work can be viewed as society's acceptance of these Persons without discrimination. However, many people with disabilities are still unable to obtain gainful occupation and are dependent on others. Our Employment and Placement services is a step towards providing employment as well as self-employment opportunities for people with disability, so that they can be financially independent and self sufficient.

## Product Specification:

### Durable Sach Foot

These offered foots are developed by making use of quality-approved wooden keel and polyurethane, in line with the illustrated parameters of the industry.

### Below Knee Prosthesis

This prosthesis is used for below the knee purpose and helps the disabled in the most efficient manner. We have made this prosthesis in a self-suspended manner and has been made of best quality active carbon fiber.

### Symes Prosthesis

Symes Prosthesis offered supports ankle disarticulation that is removal of foot through joint and comprises rigid prosthetic socket for perfectly fitting the demands of Syme's amputation.

### Chopard Prosthesis

Chopard Prosthesis offered provides for superior wearer comfort as well as allows optimum fixation with easy handling of forefoot prosthesis.

### Hip Disarticulation Prosthesis

Basically this prosthesis is made to replace the arthritic hip-joint and also in order to eliminate the damaged bearing surfaces responsible for causing pain. We have designed this prosthesis in such a way that it is bound to offer a renewed stability and workability.

### Motorized Wheel Chair

### General Type Wheelchair

### Mug Wheel Wheelchair

### Lower Limb Prosthesis

Lower limb prosthetics are devices designed to replace the function or appearance of the missing lower limb as much as possible. In contrast, lower limb orthotic devices are designed to support, supplement, or augment the function of an existing lower limb.

### Sach Foot

SACH is an acronym for "solid ankle, cushion heel," and refers to a compressible heel wedge that provides "pseudo-plantar flexion" after heel strike. The rigid wooden keel provides mid stance stability but little lateral movement. SACH is inexpensive

### Foot Adapter

These include Titanium SACH Foot Adapter that features shorter flange which provides for better strength with reducing weight. Further, the presence of forged as well as machined combination also provides for high quality, light weight as well as strong product.

### Elbow Joint Manual Lock

Manual elbow joint with an anatomically shaped under arm for mechanical prosthetic application. The integrated locking system allow the joint to lock in 12 different position.

Adaptor diameter- 50mm/55mm  
Flexion angle-120degree

### Silicon Finger

We are providing silicon cosmetic finger which will look like normal finger. We will provide 80% color matching like the normal finger.

### Cosmetic Hand

### Senator Foot

The Senator foot is a durable light weight and it simple energy returning design gives smooth gait to the user. It help the amputees to ambulate with varied speed & Participate in daily activities such as bicycling, golfing and even light jogging.

### Dynamic Prosthesis Foot

Dynamic foot available sizes: 22-28 cm

Weight capacity: 80 kg, 100 kg

Carbon foot available sizes: 22- 28 cm

Weight capacity: 80 kg, 100 kg

### Above Elbow Prosthesis Kit

Consistent of a mechanical structure, this kit also consists of a Mechanical Hand, Silicon hand Glove, Harness system, Control cable system. Made of best quality raw material, this range also comes with a complete manual guide for easy usage.

### Mechanical Hand

These make the artificial limb stronger and provide extra energy for moving the hand.

### Manual Elbow Joint

Item Code: 02

Manual elbow joint with an anatomically shaped under arm for mechanical prosthetic application. The integrated locking system allow the joint to lock in 12 different position.

Adaptor diameter- 50mm/55mm  
Flexion angle- 120degree

### Silicon Glove

It come in 9 color made up of silicon Male/female 4 sizes.

## Product Specification:

### Wheel Chair - Two In One

We offer optimum quality of wheel chairs that finds its use as a self propelled wheel chair or a transport chair. Our wheel chair is manufactured using aluminum frame.

### Vacuum Therapy

The vacuum fat stimulator, through its sucking & releasing action, helps in mobilizing and breaking down the excessive, accumulated stubborn adipose tissue.

### Lumber & Cervical Traction

System can useful for Lumber or Cervical Traction

Timer facility for Hold, Rest and Treatment time.

Three mode of operation Intermittent, Static and Combi mode.

With all standard accessories.

### Multi Joint System

To versatility with Con-Trex Multi Joint System with the dynamometer on a swivel arm the CON-TREX MJ system gives you largest possible flexibility. Whether you like to evaluate or train in prone or supine position, this system makes it possible in the easiest way.

### The CON-TREX TP Trunk Module

The CON-TREX TP trunk module, together with the CON-TREX MJ system module, forms a high performance test and training system for the trunk. The TP 500 for rehab and "normal people" and the TP 1000 for top athlete testing differ only in their torque range. The wide adjustment range, the simple positioning and the many different types of loading provided by the CON-TREX human kinetics software enable a wide field of applications for test and therapy of the trunk.

### Con-Trex Leg Press

The CON-TREX LP (linear system / leg press) was developed especially for testing and training the lower extremities in the closed kinetic chain. It allows forces upto 6000 N and speeds upto 1 m/s. The high precision and motion control properties of its regulating system provide a large field of application. It covers training of top athletes as well as training for leisure and health sports users, specific pathological use and rehabilitation (e.g. after joint replacement.)

### Product Specification:

#### Audiometer (Series 500)

Versatile series of instruments Series 500 Comprises of five truly portable models of diagnostic audiometers. These are powerful models providing all necessary basic diagnostic audiometric tests. The five models in the series are 500 MKI, 500MKIS, 500 MKII, 500 MKIIS and 500 MKIII. Superiority of the Series 500 Audiometer models is assured through ARPHI's judicious design philosophy.

Clinical Diagnostic Audiometer Air/bone puretone threshold test with masking other tone tests such as weber etc. speech reception threshold with built-in microphone speech discrimination tests with built-in microphone alternate binaural speech balance test with built-in microphone shifting voice test with built-in microphone.

#### Digital Diagnostic Audiometer

The 2001 is a new generation digital audiometer from Arphi. This clinical / diagnostic audiometer features a unique menu-driven display and user-programmable test setups for optimal operating efficiency during daily routine examinations. New features incorporated into the Arphi 2001 include, amongst others, data interface 1 dB attenuator resolution, ipsilateral masking, and simultaneous presentation of stimulus and masking binaurally.

#### Group Hearing Aid System

Arphi Group Hearing Aid Systems can be used simultaneously or separately with the desk-wired headsets and a magnetic induction loop. The magnetic loops create an electromagnetic field within the class-room and the teacher's or student's voices can be heard by a student's wearing his own pocket or body-worn hearing aid. This permits the hearing aid to act like a pocket transistor radio, and student can move about freely in the class-room during play or learning and yet hear the teacher or other students talking from their desks.

### Speech Trainers

Arphi's range of Speech Trainer models incorporate several ingenious features. The Two models are 300 B & 301 MK I.

Take-anywhere models with easy portability

Simple to use

Individual controls for each ear

Visual display of sound level

High Power speech

Battery or AC Mains operation

Built-in Voltage Regulator

Tape/ External Mic. Facility

Stereo Channel Option

Option of LP and HP Filters

### Ear Muff

The attenuation characteristics of the new design ear muff type ear defender are superior to those of ear muffs which are used currently specially in frequencies 1000Hz to 4000Hz although not fully to the specification.

### Product Specification:

#### Walking Stick

Made from quality aluminium and anodised.

Scratch proof and no peel offs.

High adjustable for user comfort.

Non abrasive special engineering plastic material pods for firm base grip

Pivotal structure of pod gives support on even and uneven surfaces.

Easy lock pin height adjustable.

CODE - OC 2017

#### Walking Stick with Tri Leg Bottom

Made from high quality Aluminium and Anodised.

Scratch proof and no peel offs.

High adjustable for user comfort.

Non abrasive special engineering plastic material pods for firm base grip

Pivotal structure of Rubber Tri Leg Bottom gives support on even and uneven surfaces.

Easy lock pin height adjustable.

CODE - OC 2150

#### Tripod Walking Stick

This secure and sturdy walking stick is lightweight and comfortable with improved stability. Helps those with poor balance. Easy lock pin height adjustable.

CODE - OC 2089

#### Quadripod Walking Stick

This secure and sturdy walking stick is lightweight and comfortable with improved stability. Helps those with poor balance. Easy lock pin height adjustable.

CODE - OC 2090

#### Under Arm Crutches

Aluminum Crutches are lighter and more durable than wooden one.

Lock pin height adjustable

Non- skid rubber tips provided for better ground grip.

Weight capacity: up to 100 kgs.

Available in 3 sizes.

#### Reciprocal Folding Walker

Rugged lightweight design for stability and ease of use.

Folds to 4" wide for convenient transportation and storage.

Large rubber tips provide traction and control.

Quick, easy tool-free assembly.

**Elbow Stick**  
Made from lightweight Aluminum.  
One piece molded plastic cuff and handgrip assembly for improving balance, reduce hand and wrist fatigue.  
Push button adjustment for elbow height.  
Non-slip pivotal design for better and angular ground grip.  
CODE - OC 2113

**Tri-Axle Hinged Knee Brace**  
Provide maximum protection with near-normal knee motion.  
CODE - OC 2132

### Key persons:

Mr. Parag Kamble (Proprietor)

### Year of establishment:

2009

## Product Specification:

**Knee Disarticulation Prosthesis**  
We have a wide range of prosthetic knee joints suitable for knee disarticulation amputation & hence maintaining the length of the prosthetics side similar to the sound side.

**Partial Foot Prosthesis**  
In such cases carbon fiber foot plate is provided along with the appropriate socket, where minimum clearance is present. This is suitable for partial foot as well as Chop art, Pirog off or Syme's amputation.

**Passive Hand**  
Here the exact pattern of amputation decides the prosthetic fitment for the patients. We provide passive hand as well as Cosmo Functional Prosthesis also. The Silicone gloves we supply, have been fully tested and comply with ISO 9000 standard. there is a layer of nylon fabric inside the gloves to give them their superior strength and a double layer in the finger tips on some models for extra strength.

**Above Knee Prosthesis**  
Depending on the stump condition, users requirement & activity level we provide many variants of knee joints from mechanical, single axis with hydraulic cylinder, pneumatic cylinder or microprocessor knee units to achieve any function desirable to the users.

**Below Knee Prosthesis**  
We fabricate modular prostheses using modern socket fabrication technique. The modular components used varies from M. S, aluminum, S. S. & titanium depending upon the cases & patients preference. These artificial limb has cosmetic foam covering of skin tone. Suspension can be provided in the form of fit kit lock, expulsion valve, suspension sleeve & self suspension system.

**Hip Disarticulation Prosthesis**  
Recently a new hip joints has been invented by a German company which allow the user to propel the body forward without learning on the sound side, thus saving more energy of the user while walking.

**Myoelectric Arm Prostheses**  
In mechanical hand body power is used to control to excursion of the cable used to open & close the hand where as in myo-electrical prostheses it is done with the pair of sensors.

**Ossur Rebound Air Walker**  
Rebound Air Walker is available in low top or standard height, Contoured strut design allows the walker frame for snug fitting to the patient. Unique shock absorbing sole reduces impact of heel strike during ambulation. Rocker bottom is specially engineered to be low & wide to help promote a natural stable gait.

**Knee Cage**  
Knee Cage is the customized knee brace which can be given for the conditions like mild to moderate Valgus / Varus deformity and / or Genu Recurvatum. When off-the-shell brace are not fitting properly to the patient due to its unusual shape, customized brace is the only option. Joint can be Aluminum or Mild Steel depending upon the patients profile.

**Silicon Breast Prosthesis**  
This Silicon Breast Prosthesis is made with high quality silicone. Washable and reusable. These Realistic Breast Forms have softness, flexibility and exhibit gentle and realistic movement when worn in Post Mastectomy apparel. The soft, flat backs contour immediately to the chest wall configuration. They have a matte surface covering that exhibits a tactile nature closely replicating human skin.

**AFO Ankle- Foot- Orthoses**

This Leaf Spring AFO is a low profile, comfortable, polypropylene ankle-foot-orthoses, designed to support flaccid drop foot. Its new low profile, energy return design makes it more flexible, efficient, and comfortable than traditional models.

**Osteoarthritic Knee Brace**

If you are looking for an easy-to-fit, off-the-shell ligament brace for low impact activities of daily living, then the Paradigm OTS is just what you need. It has a large "open window" frame design, a contoured medial flare, flexible sub shells that comfort to patient anatomy, an Adjustable ATS Strap & condylar ergonomics, paradigm OTS is engineered for comfort & compliance.

**Partial Foot Prosthesis**

The Silicone foot shell we supply, have been fully tested and comply with ISO 9000 standard. They are both good looking and tough, there is a layer of nylon fabric inside the shell to give them their superior strength and a double layer in the toes tips on some models for extra strength. We can have it off-the-shell, Semi-customized OR Customized depending on the pattern of amputation.

**Finger Prosthesis**

A custom made Finger Prosthesis or Finger Tip Prosthesis will go a long way towards creating a more acceptable cosmetic result and may also help restore function.

## Product Specification:

### Manual Wheel Chairs

Chrome-plated Manual Wheel Chairs are being offered by us. These have sturdy frame that has a corrosion resistant body as well as a longer lifespan. Our range of wheelchairs is equally suitable in hospitals or for personal use. These are easy to fold and give maximum sitting comfort.

### Motorized Wheel Chairs

A highly functional range of Motorized Wheel Chairs is being offered by us. These have a highly advanced mechanism that supports easy movement with little strain. Moreover, these also provide comfortable seating to the user for extended periods of time. Our wheel chairs come in various models to suit the clients' needs.

### Walking Stick

A reliable range of Walking Sticks is being offered by us at market leading prices. These are manufactured using highly sturdy raw material, which can support heavy weight. The base of the walking stick is slightly enlarged and supported with rubber, so as that there is greater stability.

### Rolators

A mechanically effective range of Rolators can be availed from us in varied specifications. These are mostly used for moving persons whose faculties have been debilitated. The rolators have sturdy rubber wheels that can rotate in all directions. This allows movement of the patient in 360 degrees.

### Walkers

A qualitative range of Walkers is being offered by us. These are specially with suitable material that is light yet sturdy. This helps the person in moving with greater ease from one place to another. The front of the walker has two wheels, which facilitate forward movement of the aged, handicapped or injured person.

### Crutches

A dependable range of Crutches is being offered by us. These crutches are used by aged, disabled or injured people, who need support for walking. Our crutches come in various heights and sizes, so that all kinds of patients are looked after.
